See Target Date Solutions FROM A WHOLE NEW PERSPECTIVE
Let’s face it: These days, the retirement landscape is getting increasingly more complex. Participants are living longer. New fiduciary realities are looming. We understand the challenges that come with navigating this changing world, which is why, at T. Rowe Price, our Target Date Solutions don’t just perform in spite of change—but because of it.

With an active, long-term approach and a robust glide path built to address a spectrum of risks, the slightest tilt—or the smallest adjustment—offers the potential to bring the world back into balance:

*“Change is an investor’s only constant.”*

Thomas Rowe Price Jr.

It happens so quickly you might not even notice it. But the power of this performance comes from a series of dynamic adjustments happening closer to the ground. Feet shuffle, grips shift. The bar tilts—all resulting in a powerful, artful landing. When the same collaborative, active approach is applied to our Target Date Solutions, the results can be nothing short of beautiful.

Beautiful adjustments CAN BRING EVERYTHING INTO FOCUS
At the core of everything we do is a deeply rooted reality: You need a solution that both helps plan sponsors manage risks, and also helps participants across a wide range of demographics accumulate the income they will need to last a lifetime.

You can benefit from an asset allocation philosophy that blends our deep capabilities in investment management with more than 35 years of retirement solutions expertise—informing a design for our Target Date Solutions seeking to meet plan sponsors’ investment objectives and participants’ retirement needs head-on.

How we think

A DUAL FOCUS ON BALANCING SPONSOR AND PARTICIPANT OBJECTIVES

Investment Management
Our 500+ investment professionals1 around the world have capabilities that span all major asset classes.

Retirement
Experience with 3,200+ plans2 and 1.9 million participants3 gives us a deep understanding of participant behavior.

Asset Allocation
This expertise has helped us pioneer Target Date Solutions that seek to meet diverse client objectives since 2002.

---

1 78 portfolio managers, 19 associate portfolio managers, 10 regional portfolio managers, 11 sector portfolio managers, 140 investment analysts/credit analysts, 47 quantitative analysts, 4 solutions associates, 45 associate analysts, 28 portfolio specialists/generalists, 2 strategists, 5 specialty analysts, 53 traders, 11 trading analysts, 2 economists, 31 portfolio modeling associates, and 22 management associates.

2 Client Relationships are defined as the total recordkeeping number of T. Rowe Price clients across the firm.

3 Participant Relationships are defined as the total recordkeeping number of T. Rowe Price participants across the firm.

As of December 31, 2016.
What we build

AN INVESTMENT FRAMEWORK DESIGNED TO ADDRESS RISK

Helping to provide participants with income in retirement is a primary driver behind our investment approach. This means providing solutions that are actively managed through retirement—not just up to their retirement date.

Three differentiators help us reach this goal:

1. A robust glide path design and diversification that drives better outcomes
2. A disciplined tactical allocation process that strives to enhance returns and mitigate risk
3. The strength of our actively managed underlying funds

A robust glide path design and diversification

Based on plan sponsors’ objectives, we offer two glide paths that—while similar in their makeup—balance market and inflation/longevity risks in varying ways.

<table>
<thead>
<tr>
<th>Retirement Glide Path</th>
<th>Target Glide Path</th>
</tr>
</thead>
<tbody>
<tr>
<td>Higher equity allocation in transition to retirement than the industry average</td>
<td>Equity allocation in transition to retirement close to industry average</td>
</tr>
<tr>
<td>Higher potential to support income withdrawals over longer time periods</td>
<td>Higher potential to support moderate postretirement withdrawal time periods</td>
</tr>
<tr>
<td>Higher potential growth during the accumulation phase</td>
<td>Lower potential volatility in the transition to retirement</td>
</tr>
<tr>
<td>55% equity at the expected retirement date</td>
<td>42.5% equity at the expected retirement date</td>
</tr>
</tbody>
</table>

Market | Inflation/Longevity | Risk Factors

The T. Rowe Price Funds do not guarantee a particular level or duration of income.
To help deliver strong performance within our Target Date Solutions, we look for opportunities to enhance returns and mitigate risk by making modest dynamic market adjustments across portfolios.

A disciplined tactical allocation process

To help deliver strong performance within our Target Date Solutions, we look for opportunities to enhance returns and mitigate risk by making modest dynamic market adjustments across portfolios.

3 The strength of our actively managed underlying funds

Active portfolio management added excess returns versus their custom passive benchmarks2 in 100% of rolling 10-year periods since inception for each T. Rowe Price Retirement Fund.3

Our Target Date portfolios are invested across asset classes, regions, styles, and capitalizations seeking to help reduce portfolio volatility and deliver strong, long-term performance.

Our Asset Allocation Committee meets monthly to review our current portfolio positions, making small adjustments within +/-5 percentage points of our neutral allocation.

1 Underlying investments of the T. Rowe Price Retirement Funds and Target Funds.2 Because glide-path effects—such as a shift in equity exposure—can distort fund performance relative to common target date indexes (such as those maintained by Standard & Poor’s), T. Rowe Price has created its own combined passive benchmarks for the Retirement Funds. These benchmarks are constructed from four indexes that reflect the broad asset classes of the underlying RF portfolios: U.S. Equity: The Russell 3000® Index, Non-U.S. Equity: The MSCI All Country World Index ex USA, Fixed Income: The Bloomberg Barclays U.S. Aggregate Bond Index, Inflation Focused Fixed Income: The Bloomberg Barclays U.S. 1–5 Year Treasury TIPS Index. The combined benchmarks mirror the strategic allocations for each fund as they move along their glide paths but do not include tactical adjustments. The combined passive benchmarks allow us to measure the value added or detracted by T. Rowe Price via tactical allocation and active security selection.3 T. Rowe Price examined the performance of all the Retirement Funds that had at least a 10-year track record as of December 31, 2016. The Retirement 2060 Fund was excluded from the study because of its relatively short track record. Past performance cannot guarantee future results. The results of the complete study can be obtained by calling T. Rowe Price at 1-800-638-7890.
How it delivers

**IT ALL ADDS UP TO PROVEN PERFORMANCE FOR YOU AND YOUR CLIENTS**

A robust glide path design. A disciplined tactical allocation process. Strong, actively managed underlying funds. All three components of our Target Date Solutions seek to deliver consistent, long-term investment performance and drive better retirement outcomes.

Meet the people behind the performance

Our target date investment team averages both 20 years of investment management experience and 19 years of tenure with T. Rowe Price.

**Jerome A. Clark, CFA**
Portfolio Manager
- 24 years of investment experience
- 24 years with T. Rowe Price
- MBA, The Johns Hopkins University

**Wyatt A. Lee, CFA**
Portfolio Manager
- 19 years of investment experience
- 17 years with T. Rowe Price
- MBA, Washington University

**Kimberly E. DeDominicis**
Associate Portfolio Manager
- 17 years of investment experience
- 16 years with T. Rowe Price
- MBA, New York University

---

**See the Strength in Our Retirement Fund Performance**

- **Outperformance over peers**
  - Percentage of Retirement Funds in top quartile of their Lipper peer group
  - 83%

- **Outperformance over custom passive benchmark**
  - Percent of time, on average, that the Retirement Funds exceeded the custom passive benchmark
  - 85% for 3-year, 88% for 5-year, 100% for 10-year

- **Outperformance over S&P Target Date Index**
  - Percentage of Retirement Funds that exceeded the S&P Target Date Index
  - 97% for 3-year, 97% for 5-year, 96% for 10-year

*Figures reflect the aggregate performance of the Retirement 2005 through Retirement 2055 Funds. Of the Retirement Fund series, 10 of 12 Funds, 12 of 12 Funds, and 12 of 12 Funds outperformed their Lipper peer group for each of the 3-, 5-, and 10-year periods ended March 31, 2017. For most current month-end performance visit troweprice.com/adjustments. Past performance cannot guarantee future results.*

*1 Figures reflect the aggregate performance of the Retirement 2005 through Retirement 2055 Funds. Of the Retirement Fund series, 10 of 12 Funds, 12 of 12 Funds, and 12 of 12 Funds outperformed their Lipper peer group for each of the 3-, 5-, and 10-year periods ended March 31, 2017. For most current month-end performance visit troweprice.com/adjustments. Past performance cannot guarantee future results.*

*2 The average across one-year rolling periods was 60%. To account for the differing inception dates of each Retirement Fund, these outperformance averages were time weighted—that is, the results are based on the total performance periods in each time frame provided by each fund. Because glide-path effects vary for different glide paths relative to common target date indexes (such as those maintained by Standard & Poor’s), T. Rowe Price has created its own combined passive benchmarks for the Retirement Funds. These benchmarks are constructed from four indexes that reflect the broad asset classes in the underlying RF portfolio: U.S. Equity: The Russell 3000® Index, Non-U.S. Equity: The MSCI All Country World Index, U.S. Fixed Income: The Bloomberg Barclays U.S. Aggregate Bond Index, Inflation Focused Fixed Income: The Bloomberg Barclays U.S. 1–5 Year Treasury Inflation-Indexed Securities (TIPS) Index.

The combined benchmarks mirror the strategic allocations for each fund as they move along their glide paths but do not include tactical adjustments. The combined passive benchmarks allow us to measure the value added or detracted by T. Rowe Price via tactical allocation and active security selection. This study is as of December 31, 2016 and is conducted annually.

*3 38 of 39 funds outperformed the S&P Target Index for the 1-year period ended 3/31/17. 35 of 36, 35 of 36 and 23 of 24 outperformed the S&P Target Index for the 3-, 5- and 10-year periods ended 3/31/17, respectively. S&P Target Date Index is a benchmark series reflecting the consensus asset allocation and glide path of a subset of Target Date Funds that generally house investment portfolios characterized by declining total equity exposure after retirement and a relatively aggressive total equity exposure near retirement.*
PUT THE POWER OF OUR ADJUSTMENTS TO WORK FOR YOUR CLIENTS

To learn more about our Target Date Solutions or request a prospectus, visit troweprice.com/adjustments or call 1-800-371-4613.

Request a prospectus, which includes investment objectives, risks, fees, expenses, and other information you should read and consider carefully before investing.

The principal value of the Retirement Funds and Target Funds (collectively the “Target Date Funds”) is not guaranteed at any time, including at or after the target date, which is the approximate year an investor plans to retire (assumed to be age 65) and likely stop making new investments in the fund. If an investor plans to retire significantly earlier or later than age 65, the funds may not be an appropriate investment even if the investor is retiring on or near the target date. The Target Date Funds’ allocations among a broad range of underlying T. Rowe Price stock and bond funds will change over time. The Retirement Funds emphasize potential capital appreciation during the early phases of retirement asset accumulation, balance the need for appreciation with the need for income as retirement approaches, and focus on supporting an income stream over a long-term retirement withdrawal horizon. The Target Funds emphasize asset accumulation prior to retirement, balance the need for reduced market risk and income as retirement approaches, and focus on supporting an income stream over a moderate postretirement withdrawal horizon. The Target Date Funds are not designed for a lump-sum redemption at the target date and do not guarantee a particular level of income. The key difference between the Retirement Funds and the Target Funds is the overall allocation to equity; although they each maintain significant allocations to equities both prior to and after the target date, the Retirement Funds maintain a higher equity allocation, which can result in greater volatility over shorter time horizons. Diversification cannot assure a profit or protect against loss in a declining market.
