**INVESTMENT OBJECTIVE AND STRATEGY**

The fund seeks to provide capital growth, current income, and preservation of capital through a portfolio of stocks and fixed income securities.

Invests approximately 65% of total assets in U.S. and foreign common stocks and 35% in fixed-income securities.

At least 25% of total assets will be invested in fixed-income senior securities.

**BENEFITS AND RISKS**

Offers a way to balance the potential capital appreciation of common stocks with the income and relative stability of bonds over the long term.

Stock prices can fall because of weakness in the broad market, a particular industry, or specific holdings.

Bonds may decline due to rising interest rates, a credit rating downgrade, or failure of the issuer to make timely payments of interest or principal.

Foreign investments are subject to risks, including adverse political and economic developments overseas, greater volatility, less liquidity, and the possibility that foreign currencies will decline against the dollar.
