INVESTMENT OBJECTIVE AND STRATEGY

The fund seeks to provide high current income and, secondarily, capital appreciation.

Invests at least 80% of its net assets in bonds that are issued by companies that are located or listed in, or conduct the predominant part of their business activities in, emerging market countries.

The fund may invest in unrated or below investment-grade bonds.

BENEFITS AND RISKS

Offers potential for high current income and capital appreciation by investing primarily in high-yielding, high-risk bonds in emerging markets in Latin America, Asia, Europe, Africa, and the Middle East.

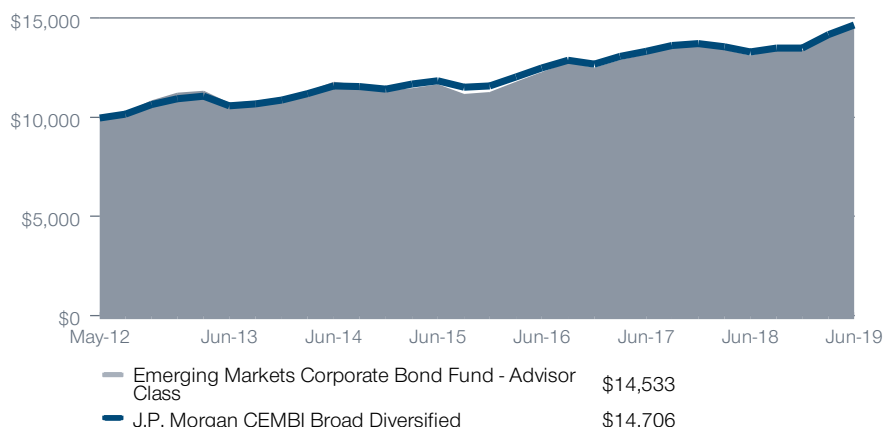

Bonds from emerging markets can offer yields that are higher than those provided by high-quality U.S. and foreign bonds, as well as higher capital appreciation potential.

Involves a high-risk approach to income from foreign bonds, and its share price could fluctuate significantly.

Subject to the risks unique to international investing, including unfavorable changes in currency values, as well as interest rate and credit risks normally associated with investing in bonds.

CUMULATIVE RETURNS

Growth of \$10,000
