*The Fund operates under a contractual expense limitation that expires on February 29, 2020. As a result of other class' expense limitations, T. Rowe Price Associates, Inc. waived fund-level expenses ratably across all classes. Figure is equivalent to the annual Operating Expense ratio. The fund's net expense ratio excludes expenses permanently waived as a result of investments in other T. Rowe Price mutual funds and expenses that were waived or borne by T. Rowe Price pursuant to the fund's expense limitation, but includes expenses associated with investments in non-T. Rowe Price Investment companies.

INVESTMENT OBJECTIVE AND STRATEGY

The fund seeks long-term capital appreciation and income.

The Fund's broad multi-asset class opportunity set includes developed markets and emerging markets equities, a wide range of global developed markets and emerging markets bond strategies, and various diversifying strategies designed to improve risk-adjusted returns.

The Fund can tactically overweight and underweight asset classes from their normal allocation. The Fund's normal allocation is 60% equities, 30% global fixed income including exposure to below-investment-grade securities, and 10% alternative investments.

Tactical decisions are based on a detailed assessment of cross-asset valuations and global capital markets conditions. Tactical decisions may change the risk profile of the fund.

BENEFITS AND RISKS

In a single offering, the fund offers, global diversification across asset classes and regions of the world, tactical views expressed through portfolio reallocations, and bottom up security selection to create an actively managed global portfolio.

The fund is subject to the unique risks of international investing, including unfavorable currency exchange rates, political or economic uncertainty abroad, or abrupt and severe price declines.

These risks are heightened for investments in emerging markets. The portfolio's investments in alternative investments and hedge funds are difficult to value and monitor when compared with more traditional investments, and may increase the fund's liquidity risks. Diversification cannot assure a profit or protect against loss in a declining market. Derivatives are used in the fund for selective market exposures.

MANAGEMENT

The Global Allocation Fund is managed by Charles Shriver. The portfolio manager is responsible for the strategic design and day-to-day management of the Fund. This includes portfolio design, positioning, performance, and risk-management oversight. The Fund's tactical asset allocation decisions are made by the firm's Asset Allocation Committee. The Committee is chaired by the head of Asset Allocation, and includes some of the firm's most senior investment management professionals across major asset classes. Charles is the co-chair of the firm's Asset Allocation Committee. Individual security selection is made by portfolio managers of the Fund's component strategies drawing on the fundamental insights of T. Rowe Price's team of around 200 global research analysts.

Additional Disclosures

Morningstar rated the fund 5 stars among 376 World Allocation funds for the 3-year period (as applicable) ending 3/31/2018, respectively. The Morningstar Rating™ for funds, or "star rating", is calculated for funds with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star.
