

SUMMARY PROSPECTUS

October 1, 2019

PRPIX TICCX	T. ROWE PRICE Corporate Income Fund Investor Class I Class
----------------	--

The Securities and Exchange Commission (SEC) has not approved or disapproved these securities or passed upon the adequacy of this prospectus. Any representation to the contrary is a criminal offense.

Before you invest, you may want to review the fund's prospectus, which contains more information about the fund and its risks. You can find the fund's prospectus, shareholder reports, and other information about the fund online at troweprice.com/prospectus. You can also get this information at no cost by calling **1-800-638-5660**, by sending an e-mail request to info@troweprice.com, or by contacting your financial intermediary. This Summary Prospectus incorporates by reference the fund's prospectus, dated October 1, 2019, as amended or supplemented, and Statement of Additional Information, dated October 1, 2019, as amended or supplemented.

Beginning on January 1, 2021, as permitted by SEC regulations, paper copies of the T. Rowe Price funds' annual and semiannual shareholder reports will no longer be mailed, unless you specifically request them. Instead, shareholder reports will be made available on the funds' website (troweprice.com/prospectus), and you will be notified by mail with a website link to access the reports each time a report is posted to the site.

If you already elected to receive reports electronically, you will not be affected by this change and need not take any action. At any time, shareholders who invest directly in T. Rowe Price funds may generally elect to receive reports or other communications electronically by enrolling at troweprice.com/paperless or, if you are a retirement plan sponsor or invest in the funds through a financial intermediary (such as an investment advisor, broker-dealer, insurance company, or bank), by contacting your representative or your financial intermediary.

You may elect to continue receiving paper copies of future shareholder reports free of charge. To do so, if you invest directly with T. Rowe Price, please call T. Rowe Price as follows: IRA, nonretirement account holders, and institutional investors, **1-800-225-5132**; small business retirement accounts, **1-800-492-7670**. If you are a retirement plan sponsor or invest in the T. Rowe Price funds through a financial intermediary, please contact your representative or financial intermediary, or follow additional instructions if included with this document. Your election to receive paper copies of reports will apply to all funds held in your account with your financial intermediary or, if you invest directly in the T. Rowe Price funds, with T. Rowe Price. Your election can be changed at any time in the future.

Investment Objective

The fund seeks to provide high income and some capital growth.

Fees and Expenses

This table describes the fees and expenses that you may pay if you buy and hold shares of the fund. You may also incur brokerage commissions and other charges when buying or selling shares of the fund, which are not reflected in the table.

Fees and Expenses of the Fund

	Investor Class	I Class
Shareholder fees (fees paid directly from your investment)		
Maximum account fee	\$20 ^a	—
Annual fund operating expenses (expenses that you pay each year as a percentage of the value of your investment)		
Management fees	0.44%	0.44%
Distribution and service (12b-1) fees	—	—
Other expenses	0.17	0.05
Total annual fund operating expenses	0.61	0.49

^a Subject to certain exceptions, accounts with a balance of less than \$10,000 are charged an annual \$20 fee.

Example This example is intended to help you compare the cost of investing in the fund with the cost of investing in other mutual funds. The example assumes that you invest \$10,000 in the fund for the time periods indicated and then redeem all of your shares at the end of those periods, that your investment has a 5% return each year, and that the fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	1 year	3 years	5 years	10 years
Investor Class	\$62	\$195	\$340	\$762
I Class	50	157	274	616

Portfolio Turnover The fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when the fund's shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the fund's performance. During the most recent fiscal year, the fund's portfolio turnover rate was 113.7% of the average value of its portfolio.

Investments, Risks, and Performance

Principal Investment Strategies The fund will normally invest at least 80% of its net assets (including any borrowings for investment purposes) in corporate debt securities. Holdings will mainly consist of investment-grade bonds, although the fund has the flexibility to purchase

some noninvestment-grade bonds (also called high-yield bonds or junk bonds). The fund may invest in other securities in an effort to enhance income and achieve capital growth. These include convertible securities and preferred stock; mortgage- and asset-backed securities, including mortgage-related derivatives; and U.S. Treasury and agency securities. In addition, up to 10% of the fund's total assets may be invested in non-U.S. dollar-denominated bonds and debt securities (including securities of issuers in emerging markets), and there is no limit on the fund's investments in U.S. dollar-denominated foreign securities. The fund may purchase securities of any maturity and its weighted average maturity will vary with market conditions.

At least 85% of the fund's net assets must have received an investment-grade rating (i.e., rated in one of the four highest rating categories) by at least one major credit rating agency or, if not rated by any credit rating agency, deemed to be of investment-grade quality by T. Rowe Price. Such investment-grade investments could include "split-rated" securities, which are securities that are rated as investment-grade by at least one credit rating agency but rated below investment-grade by another agency. Up to 15% of the fund's net assets can be invested in noninvestment-grade securities including asset-backed and mortgage-backed securities. The fund will not purchase any individual bond that is rated below B (or equivalent) by any major credit rating agency, and the fund's investments in bonds that are rated B (or equivalent) at the time of purchase will not exceed 5% of its net assets.

The fund's investment program provides some flexibility in seeking high income. Within the limits described, the fund can seek the most advantageous combination of securities. For example, when the difference is small between the yields of higher and lower rated securities, the fund may focus its investments in higher-quality issues. When the yield differential is large, the fund may move down the credit scale in search of higher yields. Likewise, if our outlook for foreign securities is favorable, the fund may purchase bonds issued by foreign companies at times when they offer higher yields than U.S. bonds of comparable quality and maturity.

The fund may sell holdings for a variety of reasons, such as to adjust the portfolio's average maturity, duration, or overall credit quality, or to shift assets into and out of higher- or lower-yielding securities or certain sectors.

Principal Risks As with any mutual fund, there is no guarantee that the fund will achieve its objective. The fund's share price fluctuates, which means you could lose money by investing in the fund. The principal risks of investing in this fund are summarized as follows:

Active management risks The investment adviser's judgments about the attractiveness, value, or potential appreciation of the fund's investments may prove to be incorrect. The fund could underperform other funds with a similar benchmark or similar objectives and investment strategies if the fund's overall investment selections or strategies fail to produce the intended results.

Fixed income markets risks Economic and other market developments can adversely affect fixed income securities markets. At times, participants in these markets may develop concerns about the ability of certain issuers of debt instruments to make timely principal and interest payments, or they may develop concerns about the ability of financial institutions that make markets in certain debt instruments to facilitate an orderly market. Those concerns could cause

increased volatility and reduced liquidity in particular securities or in the overall fixed income markets and the related derivatives markets. A lack of liquidity or other adverse credit market conditions may hamper the fund's ability to sell the debt instruments in which it invests or to find and purchase suitable debt instruments.

Interest rate risks The prices of, and the income generated by, debt instruments held by the fund may be affected by changes in interest rates. A rise in interest rates typically causes the price of a fixed rate debt instrument to fall and its yield to rise. Conversely, a decline in interest rates typically causes the price of a fixed rate debt instrument to rise and the yield to fall. Generally, funds with longer weighted average maturities and durations carry greater interest rate risk. In recent years, the U.S. and many global markets have experienced historically low interest rates. Although interest rates have begun to rise and may continue doing so, interest rates may decline in response to ongoing global trade disputes, increasing the exposure of bond funds to the risks associated with declining interest rates.

Credit risks An issuer of a debt instrument could suffer an adverse change in financial condition that results in a payment default (failure to make scheduled interest or principal payments), rating downgrade, or inability to meet a financial obligation. The fund's exposure to credit risk is increased to the extent the fund invests in noninvestment-grade ("junk") bonds. Junk bonds should be considered speculative as they carry greater risk of default and erratic price swings due to adverse changes in the credit quality of the issuer.

Liquidity risks The fund may not be able to meet redemption requests without significantly diluting the remaining shareholders' interests in the fund. In addition, the fund may not be able to sell a holding in a timely manner at a desired price. Reduced liquidity in the bond markets can result from a number of events, such as limited trading activity, reductions in bond inventory, and rapid or unexpected changes in interest rates. Markets with lower overall liquidity could lead to greater price volatility and limit the fund's ability to sell a holding at a suitable price.

Prepayment and extension risks The fund is subject to prepayment risks because the principal on any debt instrument with an embedded call option may be prepaid at any time, which could reduce the security's yield and market value. The rate of prepayments tends to increase as interest rates fall, which could cause the average maturity of the portfolio to shorten. Extension risk may result from a rise in interest rates, which tends to make callable debt instruments more volatile.

Foreign investing risks The fund's investments in foreign holdings may be adversely affected by local, political, social, and economic conditions overseas, greater volatility, reduced liquidity, or decreases in foreign currency values relative to the U.S. dollar. These risks are heightened for the fund's investments in emerging markets, which are more susceptible to governmental interference, less efficient trading markets, and the imposition of local taxes or restrictions on gaining access to the fund's investments.

Convertible securities and preferred stock risks Investments in convertible securities and preferred stocks subject the fund to risks associated with both equity and fixed income securities, depending on the price of the underlying security and the conversion price. Stocks

generally fluctuate in value more than bonds and tend to move in cycles, with periods of rising and falling prices. The value of a stock may decline due to general weakness in the stock market or because of factors that affect a particular company or industry. A convertible security may be called back by the issuer prior to maturity at a price that is disadvantageous to the fund. In addition, convertible securities are typically issued by smaller-capitalized companies whose stock prices are more volatile than companies that have access to more conventional means of raising capital. Preferred stock holders would be paid after corporate bondholders, but before common stockholders, in the event a company fails.

Performance The following performance information provides some indication of the risks of investing in the fund. The fund’s performance information represents only past performance (before and after taxes) and is not necessarily an indication of future results.

The following bar chart illustrates how much returns can differ from year to year by showing calendar year returns and the best and worst calendar quarter returns during those years for the fund’s Investor Class. Returns for other share classes vary since they have different expenses.

The fund’s return for the six months ended 6/30/19 was 9.02%.

The following table shows the average annual total returns for each class of the fund that has been in operation for at least one full calendar year, and also compares the returns with the returns of a relevant broad-based market index, as well as with the returns of one or more comparative indexes that have investment characteristics similar to those of the fund, if applicable.

In addition, the table shows hypothetical after-tax returns to demonstrate how taxes paid by a shareholder may influence returns. After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local

taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown. After-tax returns shown are not relevant to investors who hold their fund shares through tax-deferred arrangements, such as a 401(k) account or an IRA. After-tax returns are shown only for the Investor Class and will differ for other share classes.

Average Annual Total Returns

Investor Class	Periods ended December 31, 2018				Inception date 10/31/1995
	1 Year	5 Years	10 Years	Since inception	
Returns before taxes	-3.06 %	3.14 %	6.31 %	—%	
Returns after taxes on distributions	-4.40	1.52	4.46	—	
Returns after taxes on distributions and sale of fund shares	-1.81	1.74	4.31	—	
I Class					12/17/2015
Returns before taxes	-2.84	—	—	2.84	
Bloomberg Barclays U.S. Corporate Investment Grade Bond Index (reflects no deduction for fees, expenses, or taxes)	-2.51	3.28	5.92	3.15 ^a	
Lipper Corporate Debt Funds BBB-Rated Average	-2.55	2.90	5.61	3.06 ^b	

^a Return since 12/17/15.

^b Return since 12/31/15.

Management

Investment Adviser T. Rowe Price Associates, Inc. (T. Rowe Price or Price Associates)

Portfolio Manager	Title	Managed Fund Since	Joined Investment Adviser
Steve Boothe	Cochairman of Investment Advisory Committee	2018	1999
Lauren T. Wagandt	Cochairman of Investment Advisory Committee	2018	2009

Purchase and Sale of Fund Shares

The fund (other than the I Class) generally requires a \$2,500 minimum initial investment (\$1,000 minimum initial investment if opening an IRA, a custodial account for a minor, or a small business retirement plan account). Additional purchases generally require a \$100 minimum. These investment minimums generally are waived for financial intermediaries and certain employer-sponsored retirement plans submitting orders on behalf of their customers.

The I Class requires a \$1 million minimum initial investment and there is no minimum for additional purchases, although the initial investment minimum generally is waived for financial intermediaries, retirement plans, and certain institutional client accounts for which T. Rowe Price or its affiliate has discretionary investment authority.

For investors holding shares of the fund directly with T. Rowe Price, you may purchase, redeem, or exchange fund shares by mail; by telephone (1-800-225-5132 for IRAs and nonretirement accounts; 1-800-492-7670 for small business retirement plans; and 1-800-638-8790 for institutional investors and financial intermediaries); or, for certain accounts, by accessing your account online through **troweprice.com**.

If you hold shares through a financial intermediary or retirement plan, you must purchase, redeem, and exchange shares of the fund through your intermediary or retirement plan. You should check with your intermediary or retirement plan to determine the investment minimums that apply to your account.

Tax Information

The fund declares dividends daily and pays them on the first business day of each month. Any capital gains are declared and paid annually, usually in December. Redemptions or exchanges of fund shares and distributions by the fund, whether or not you reinvest these amounts in additional fund shares, may be taxed as ordinary income or capital gains unless you invest through a tax-deferred account (in which case you will be taxed upon withdrawal from such account).

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase shares of the fund through a broker-dealer or other financial intermediary (such as a bank), the fund and its related companies may pay the intermediary for the sale of fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.
