- T. Rowe Price QM U.S. Value Equity Fund
- T. Rowe Price U.S. Equity Research Fund

July 1, 2019

- T. Rowe Price Georgia Tax-Free Bond Fund
 - T. Rowe Price Intermediate Tax-Free High Yield Fund
 - T. Rowe Price Maryland Short-Term Tax-Free Bond Fund
 - T. Rowe Price Maryland Tax-Free Money Fund
 - T. Rowe Price New Jersey Tax-Free Bond Fund
 - T. Rowe Price Tax-Efficient Equity Fund
 - T. Rowe Price Tax-Exempt Money Fund
-

Effective October 1, 2019, the following paragraph in section 2 under *The Management Fee* is removed from the prospectus of each of the T. Rowe Price funds listed above:

Pursuant to any agreement under which T. Rowe Price has agreed to waive or pay for certain expenses in order to keep a class' expenses below a certain amount, the class-specific expense limitation could result in waiving expenses that have not been allocated to only that particular class (referred to as "Fundwide Expenses"). T. Rowe Price has agreed to pay or reimburse Fundwide Expenses for all classes of the fund in the same proportional amount. Since Fundwide Expenses may be waived for all classes in certain situations in order to keep one class at or below its contractual limitation, a particular class of the fund may benefit from another class' expense limitation regardless of whether that class has its own expense limitation. In such situations, Fundwide Expenses are subject to reimbursement (within three years of the waiver) to T. Rowe Price by the fund and each class whenever the class whose

expense limitation resulted in the waiver of Fundwide Expenses is operating below its contractual expense limitation and such reimbursement will not cause the class' expense ratio (after the reimbursement is taken into account) to exceed the lower of the expense limitation in place at the time of the waiver or any expense limitation in place at the time of reimbursement. In addition, each class will only reimburse T. Rowe Price for its proportional share of Fundwide Expenses that were waived or paid.

The date of this supplement is September 30, 2019.

I Class

The Securities and Exchange Commission (SEC) has not approved or disapproved these securities or passed upon the adequacy of this prospectus. Any representation to the contrary is a criminal offense.

Beginning on January 1, 2021, as permitted by SEC regulations, paper copies of the T. Rowe Price funds' annual and semiannual shareholder reports will no longer be mailed, unless you specifically request them. Instead, shareholder reports will be made available on the funds' website (troweprice.com/prospectus), and you will be notified by mail with a website link to access the reports each time a report is posted to the site.

If you already elected to receive reports electronically, you will not be affected by this change and need not take any action. At any time, shareholders who invest directly in T. Rowe Price funds may generally elect to receive reports or other communications electronically by enrolling at troweprice.com/paperless or, if you are a retirement plan sponsor or invest in the funds through a financial intermediary (such as an investment advisor, broker-dealer, insurance company, or bank), by contacting your representative or your financial intermediary.

You may elect to continue receiving paper copies of future shareholder reports free of charge. To do so, if you invest directly with T. Rowe Price, please call T. Rowe Price as follows: IRA, nonretirement account holders, and institutional investors, **1-800-225-5132**; small business retirement accounts, **1-800-492-7670**. If you are a retirement plan sponsor or invest in the T. Rowe Price funds through a financial intermediary, please contact your representative or financial intermediary, or follow additional instructions if included with this document. Your election to receive paper copies of reports will apply to all funds held in your account with your financial intermediary or, if you invest directly in the T. Rowe Price funds, with T. Rowe Price. Your election can be changed at any time in the future.

Investment Objective

The fund seeks long-term growth of capital through investments primarily in the common stocks of companies located (or with primary operations) in the emerging market countries of Europe.

Fees and Expenses

This table describes the fees and expenses that you may pay if you buy and hold shares of the fund. You may also incur brokerage commissions and other charges when buying or selling shares of the fund, which are not reflected in the table.

Fees and Expenses of the Fund

	Investor Class	I Class
Shareholder fees (fees paid directly from your investment)		
Redemption fee (as a percentage of amount redeemed on shares held for 90 days or less) ^a	2.00%	2.00%
Maximum account fee	\$20 ^b	—
Annual fund operating expenses (expenses that you pay each year as a percentage of the value of your investment)		
Management fees	1.04%	1.04%
Distribution and service (12b-1) fees	—	—
Other expenses	0.58	0.26 ^d
Total annual fund operating expenses	1.62	1.30
Fee waiver/expense reimbursement ^c	(0.20)	(0.21) ^d
Total annual fund operating expenses after fee waiver/expense reimbursement	1.42	1.09^d

^a Effective April 1, 2019, the fund will no longer assess a redemption fee on any redemption from the fund (or exchange out of the fund), regardless of how long the shares were held.

^b Subject to certain exceptions, accounts with a balance of less than \$10,000 are charged an annual \$20 fee.

^c As a result of class-specific expense limitations, T. Rowe Price Associates, Inc. waived fund-level expenses ratably across all classes.

^d T. Rowe Price Associates, Inc., has agreed (through February 28, 2021) to pay the operating expenses of the fund's I Class excluding management fees; interest; expenses related to borrowings, taxes, and brokerage; nonrecurring, extraordinary expenses; and acquired fund fees and expenses ("I Class Operating Expenses"), to the extent the I Class Operating Expenses exceed 0.05% of the class' average daily net assets. The agreement may be terminated at any time beyond February 28, 2021, with approval by the fund's Board of Directors. Any expenses paid under this agreement (and a previous limitation of 0.05%) are subject to reimbursement to T. Rowe Price Associates, Inc., by the fund whenever the fund's I Class Operating Expenses are below 0.05%. However, no reimbursement will be made more than three years from the date such amounts were initially waived or reimbursed. The fund may only make repayments to T. Rowe Price Associates, Inc., if such repayment does not cause the I Class Operating

Expenses (after the repayment is taken into account) to exceed the lesser of: (1) the limitation on I Class Operating Expenses in place at the time such amounts were waived; or (2) the current expense limitation on I Class Operating Expenses.

Example This example is intended to help you compare the cost of investing in the fund with the cost of investing in other mutual funds. The example assumes that you invest \$10,000 in the fund for the time periods indicated and then redeem all of your shares at the end of those periods, that your investment has a 5% return each year, and that the fund's operating expenses remain the same. The example also assumes that an expense limitation arrangement currently in place is not renewed; therefore, the figures have been adjusted to reflect fee waivers or expense reimbursements only in the periods for which the expense limitation arrangement is expected to continue. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	1 year	3 years	5 years	10 years
Investor Class	\$145	\$471	\$843	\$1,887
I Class	111	370	672	1,530

Portfolio Turnover The fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when the fund's shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the fund's performance. During the most recent fiscal year, the fund's portfolio turnover rate was 41.7% of the average value of its portfolio.

Investments, Risks, and Performance

Principal Investment Strategies The fund normally invests at least 80% of its net assets (including any borrowings for investment purposes) in the emerging markets of Europe, including Eastern Europe and the former Soviet Union. For purposes of determining whether the fund invests at least 80% of its net assets in emerging European countries, the fund relies on MSCI Inc. to determine which countries are considered emerging markets and relies on the country assigned to a security by MSCI Inc. or another unaffiliated data provider. The fund considers frontier markets to be a subset of emerging markets, and any investments in frontier markets will be counted toward the fund's 80% investment policy. The fund expects to primarily invest in common stocks of companies located (or with primary operations) in emerging markets of Europe. The countries in which the fund normally invests include, but are not limited to, the following:

- Primary Emphasis: Czech Republic, Greece, Hungary, Kazakhstan, Poland, Romania, Russia, and Turkey.
- Others: Bulgaria, Croatia, Estonia, Georgia, Latvia, Lithuania, Slovakia, Slovenia, and Ukraine.

The emerging European investable universe, due to its limited geographic scope and less developed markets, tends to rely heavily on the success of certain industries and sectors. As a result, the fund may invest up to 35% of its net assets in any industry that accounts for more

than 20% of the emerging European market as a whole, as measured by an index determined by T. Rowe Price to be an appropriate measure of the emerging European market (currently the MSCI Emerging Markets Europe Index).

The fund is “nondiversified,” meaning it may invest a greater portion of its assets in a single company and own more of the company’s voting securities than is permissible for a “diversified” fund. The fund may purchase the stocks of companies of any size.

While the adviser invests with an awareness of the outlook for certain industry sectors and individual countries within the region, the adviser’s decision-making process focuses on bottom-up stock selection. The fund may invest significantly in the banking industry and energy sector. Country allocation is driven largely by stock selection, though the adviser may limit investments in markets or industries that appear to have poor overall prospects.

Security selection reflects a growth style. The adviser relies on a global team of investment analysts dedicated to in-depth fundamental research in an effort to identify companies capable of achieving and sustaining above-average, long-term earnings growth. The adviser seeks to purchase stocks of companies at reasonable prices in relation to present or anticipated earnings, cash flow, or book value.

In selecting investments, the adviser generally favors companies with one or more of the following characteristics:

- leading or improving market position;
- attractive business niche;
- attractive or improving franchise or industry position;
- seasoned management;
- stable or improving earnings and/or cash flow; and
- sound or improving balance sheet.

The fund may sell securities for a variety of reasons, such as to secure gains, limit losses, or redeploy assets into more promising opportunities.

Principal Risks As with any mutual fund, there is no guarantee that the fund will achieve its objective. The fund’s share price fluctuates, which means you could lose money by investing in the fund. The principal risks of investing in this fund are summarized as follows:

Active management risks The investment adviser’s judgments about the attractiveness, value, or potential appreciation of the fund’s investments may prove to be incorrect. The fund could underperform in comparison to other funds with a similar benchmark or similar objectives and investment strategies if the fund’s overall investment selections or strategies fail to produce the intended results.

Risks of stock investing Common stocks generally fluctuate in value more than bonds and may decline significantly over short time periods. There is a chance that stock prices overall will decline because stock markets tend to move in cycles, with periods of rising and falling

prices. The value of a stock in which the fund invests may decline due to general weakness in the stock market or because of factors that affect a particular company or industry.

International investing risks Investing in the securities of non-U.S. issuers involves special risks not typically associated with investing in U.S. issuers. International securities tend to be more volatile and have lower overall liquidity than investments in U.S. securities and may lose value because of adverse local, political, social, or economic developments overseas, or due to changes in the exchange rates between foreign currencies and the U.S. dollar. In addition, international investments are subject to settlement practices and regulatory and financial reporting standards that differ from those of the U.S.

Emerging markets risks The risks of international investing are heightened for securities of issuers in emerging market countries. Emerging market countries tend to have economic structures that are less diverse and mature, and political systems that are less stable, than those of developed countries. In addition to all of the risks of investing in international developed markets, emerging markets are more susceptible to governmental interference, local taxes being imposed on international investments, restrictions on gaining access to the fund's investments, and less efficient trading markets with lower overall liquidity.

Frontier markets, considered by the fund to be a subset of emerging markets, generally have smaller economies and less mature capital markets than emerging markets. As a result, the risks of investing in emerging market countries are magnified in frontier market countries. Frontier markets are more susceptible to abrupt changes in currency values, have less mature markets and settlement practices, and can have lower trading volumes that could lead to greater price volatility and illiquidity.

Geographic concentration risks Because the fund concentrates its investments in a particular geographic region, the fund's performance is closely tied to the social, political, and economic conditions within that region. Political developments and changes in regulatory, tax, or economic policy in particular countries within the region could significantly affect the markets in those countries as well as the entire region. As a result, the fund is likely to be more volatile than more geographically diverse international funds.

The European financial markets have been experiencing increased volatility due to concerns over rising government debt levels of several European countries, and these events may continue to significantly affect all of Europe. European economies could be significantly affected by, among other things, rising unemployment, the imposition or unexpected elimination of fiscal and monetary controls by member countries of the European Economic and Monetary Union, uncertainty surrounding the euro, the success of governmental actions to reduce budget deficits, and a disorderly exit by the United Kingdom from the European Union.

While these events may continue to significantly affect both developed and emerging countries throughout Europe, emerging European countries continue to be more susceptible to political turmoil as their economies continue to develop. In addition, the fund typically invests a large portion of its assets in companies located or with primary operations in Russia. The fund's

heavy exposure to one country subjects the fund to a higher degree of risk, in comparison to similar regional funds investing across emerging Europe, that adverse developments in a single country will have a significant impact on its performance. The Russian economy is susceptible to declines in the production and sales of oil, government intervention, and corruption. Investing in Russia also involves risks relating to the settlement and ownership rights associated with holding Russian securities and the threat that sanctions could significantly impact the Russian economy.

Various sanctions have been instituted against Russia by the U.S., the regulatory bodies of certain other countries, and the European Union. These sanctions and the threat of additional sanctions could have further adverse consequences for the Russian economy, including continued weakening of the ruble, additional downgrades in the country's credit rating, and a significant decline in the value and liquidity of securities issued by Russian companies or the Russian government. Broader sanctions targeting specific Russian issuers or sectors of the Russian economy could prohibit the fund from investing in any securities issued by companies subject to such sanctions. In addition, these sanctions and/or any retaliatory action by Russia could require the fund to freeze its existing investments in Russian companies, which could prohibit the fund from selling these investments and potentially impact the fund's liquidity. Since the fund has significant exposure to Russian securities, these geopolitical actions could impair the fund's ability to invest in accordance with its investment program.

Nondiversification risks As a nondiversified fund, the fund has the ability to invest a larger percentage of its assets in the securities of a smaller number of issuers than a diversified fund. As a result, poor performance by a single issuer could adversely affect fund performance more than if the fund were invested in a larger number of issuers. The fund's share price can be expected to fluctuate more than that of a comparable diversified fund.

Investment style risks Different investment styles tend to shift in and out of favor depending on market conditions and investor sentiment. The fund's growth approach to investing could cause it to underperform other stock funds that employ a different investment style. Growth stocks tend to be more volatile than certain other types of stocks, and their prices may fluctuate more dramatically than the overall stock market. A stock with growth characteristics can have sharp price declines due to decreases in current or expected earnings and may lack dividends that can help cushion its share price in a declining market.

Industry risks Because the fund may invest significantly in any industry that accounts for more than 20% of the emerging European market, the fund is more susceptible to adverse developments affecting such industries and may perform poorly during a downturn in one of the industries that are heavily represented in emerging Europe. For example, the fund may at times invest heavily in banks and other financial companies or in energy-related companies. Banks can be adversely affected by, among other things, regulatory changes, interest rate movements, the availability of capital and cost to borrow, and the rate of debt defaults. The oversight of banks in emerging markets may be ineffective and underdeveloped relative to more mature markets. In particular for emerging markets, the impact of future regulation on any individual bank, or on the financial services sector as a whole, can be very difficult to

predict. In addition, companies in the energy sector can be adversely affected by political, regulatory, and economic factors including fluctuations in energy prices and the supply-and-demand of energy fuels. Such companies are also at risk of being negatively impacted by natural disasters or becoming subject to environmental damage claims.

Market capitalization risks Because the fund may invest in companies of any size, its share price could be more volatile than a fund that invests only in large companies. Small and medium-sized companies often have less experienced management, narrower product lines, more limited financial resources, and less publicly available information than larger companies. Larger companies may not be able to attain the high growth rates of successful smaller companies, especially during strong economic periods, and they may be less capable of responding quickly to competitive challenges and industry changes.

Performance The following performance information provides some indication of the risks of investing in the fund. The fund's performance information represents only past performance (before and after taxes) and is not necessarily an indication of future results.

The following bar chart illustrates how much returns can differ from year to year by showing calendar year returns and the best and worst calendar quarter returns during those years for the fund's Inventor Class. Returns for other share classes vary since they have different expenses.

EMERGING EUROPE FUND

Calendar Year Returns

The following table shows the average annual total returns for each class of the fund that has been in operation for at least one full calendar year, and also compares the returns with the returns of a relevant broad-based market index, as well as with the returns of one or more comparative indexes that have investment characteristics similar to those of the fund.

In addition, the table shows hypothetical after-tax returns to demonstrate how taxes paid by a shareholder may influence returns. After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown. After-tax returns shown are not relevant to investors who hold their fund shares through tax-deferred arrangements, such as a 401(k) account or an IRA. After-tax returns are shown only for the Investor Class and will differ for other share classes.

Average Annual Total Returns

	Periods ended December 31, 2018				Inception date 08/31/2000
	1 Year	5 Years	10 Years	Since inception	
Investor Class					
Returns before taxes	-14.44 %	-6.39 %	6.52 %	—%	
Returns after taxes on distributions	-14.73	-6.56	6.46	—	
Returns after taxes on distributions and sale of fund shares	-7.74	-4.49	5.56	—	
I Class					03/06/2017
Returns before taxes	-14.18	—	—	1.77	
MSCI Emerging Markets Europe Index Net (reflects no deduction for fees or expenses) ^a					
	-11.90	-4.47	4.55	2.73 ^b	
MSCI Emerging Markets Europe Index (reflects no deduction for fees, expenses, or taxes)					
	-11.22	-3.83	5.16	3.55 ^b	
Lipper Emerging Markets Funds Average					
	-16.27	0.37	7.53	2.16 ^c	

^a Effective July 1, 2018, the MSCI Emerging Markets Europe Index Net replaced the MSCI Emerging Markets Europe Index as the fund's primary benchmark. The new index assumes the reinvestment of dividends after the deduction of withholding taxes applicable to the country where the dividend is paid; as such, the returns of the new benchmark are more representative of the returns experienced by investors in foreign issuers.

^b Return since 3/6/17.

^c Return since 2/28/17.

Updated performance information is available through troweprice.com.

Management

Investment Adviser T. Rowe Price Associates, Inc. (T. Rowe Price)

Investment Subadviser T. Rowe Price International Ltd (T. Rowe Price International)

Portfolio Manager	Title	Managed Fund Since	Joined Investment Adviser
Ulle Adamson	Chairman of Investment Advisory Committee	2015	2002

Purchase and Sale of Fund Shares

The fund (other than the I Class) generally requires a \$2,500 minimum initial investment (\$1,000 minimum initial investment if opening an IRA, a custodial account for a minor, or a small business retirement plan account). Additional purchases generally require a \$100 minimum. These investment minimums may be waived or modified for financial intermediaries and certain employer-sponsored retirement plans submitting orders on behalf of their customers.

The I Class requires a \$1 million minimum initial investment and there is no minimum for additional purchases, although the initial investment minimum generally is waived for customers of intermediaries, certain retirement plans, and certain institutional client accounts for which T. Rowe Price or its affiliate has discretionary investment authority.

For investors holding shares of the fund directly with T. Rowe Price, you may purchase, redeem, or exchange fund shares by mail; by telephone (1-800-225-5132 for IRAs and nonretirement accounts; 1-800-492-7670 for small business retirement plans; and 1-800-638-8790 for institutional investors and financial intermediaries); or, for certain accounts, by accessing your account online through troweprice.com.

If you hold shares through a financial intermediary or retirement plan, you must purchase, redeem, and exchange shares of the fund through your intermediary or retirement plan. You should check with your intermediary or retirement plan to determine the investment minimums that apply to your account.

Tax Information

Any dividends or capital gains are declared and paid annually, usually in December. Redemptions or exchanges of fund shares and distributions by the fund, whether or not you reinvest these amounts in additional fund shares, may be taxed as ordinary income or capital gains unless you invest through a tax-deferred account (in which case you will be taxed upon withdrawal from such account).

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase shares of the fund through a broker-dealer or other financial intermediary (such as a bank), the fund and its related companies may pay the intermediary for the sale of fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.

ORGANIZATION AND MANAGEMENT

How is the fund organized?

T. Rowe Price International Funds, Inc. (the “Corporation”) was incorporated in Maryland in 1979. Currently, the Corporation consists of 26 series, each representing a separate pool of assets with different investment objectives and investment policies. Each series is an “open-end management investment company,” or mutual fund. Mutual funds pool money received from shareholders and invest it to try to achieve specified objectives.

What is meant by “shares”?

As with all mutual funds, investors purchase shares when they put money in the fund. These shares are part of the fund’s authorized capital stock, but share certificates are not issued.

Each share and fractional share entitles the shareholder to:

- Receive a proportional interest in income and capital gain distributions. For funds with multiple share classes, the income dividends for each share class will generally differ from those of other share classes to the extent that the expense ratios of the classes differ.
- Cast one vote per share on certain fund matters, including the election of the fund’s directors, changes in fundamental policies, or approval of material changes to the fund’s investment management agreement. Shareholders of each class have exclusive voting rights on matters affecting only that class.

Does the fund have annual shareholder meetings?

The mutual funds that are sponsored and managed by T. Rowe Price (the “T. Rowe Price Funds”) are not required to hold regularly scheduled shareholder meetings. To avoid unnecessary costs to the funds’ shareholders, shareholder meetings are only held when certain matters, such as changes in fundamental policies or elections of directors, must be decided. In addition, shareholders representing at least 10% of all eligible votes may call a special meeting for the purpose of voting on the removal of any fund director. If a meeting is held and you cannot attend, you can vote by proxy. Before the meeting, the funds will send or make available to you proxy materials that explain the matters to be decided and include instructions on voting by mail, telephone, or the Internet.

Who runs the fund?

General Oversight

The fund is governed by a Board of Directors (the “Board”) that meets regularly to review the fund’s investments, performance, expenses, and other business affairs. The Board elects the fund’s officers. At least 75% of Board members are independent of T. Rowe Price and its affiliates (the “Firm”).

Investment Advisers

T. Rowe Price is the fund's investment adviser and oversees the selection of the fund's investments and management of the fund's portfolio pursuant to an investment management agreement between the investment adviser and the fund. T. Rowe Price is an SEC-registered investment adviser that provides investment management services to individual and institutional investors, and sponsors and serves as adviser and subadviser to registered investment companies, institutional separate accounts, and common trust funds. The address for T. Rowe Price is 100 East Pratt Street, Baltimore, Maryland 21202. As of December 31, 2018, the Firm had approximately \$962 billion in assets under management and provided investment management services for more than 7 million individual and institutional investor accounts.

T. Rowe Price has entered into a subadvisory agreement with T. Rowe Price International under which T. Rowe Price International is authorized to trade securities and make discretionary investment decisions on behalf of the fund. T. Rowe Price International is registered with the SEC as an investment adviser, and is authorized or licensed by the United Kingdom Financial Conduct Authority and other global regulators. T. Rowe Price International sponsors and serves as adviser to foreign collective investment schemes and provides investment management services to registered investment companies and other institutional investors. T. Rowe Price International is headquartered in London and has several branch offices around the world. T. Rowe Price International is a direct subsidiary of T. Rowe Price and its address is 60 Queen Victoria Street, London EC4N 4TZ, United Kingdom.

Portfolio Management

T. Rowe Price has established an Investment Advisory Committee with respect to the fund. The committee chairman has day-to-day responsibility for managing the fund's portfolio and works with the committee in developing and executing the fund's investment program. The members of the committee are as follows: Ulle Adamson, Chairman, Malik Asif, Oliver D.M. Bell, Maria Drew, Johannes Lofstrand, Oxana Lyalina, Gonzalo Pangaro, and Ernest C. Yeung. The following information provides the year that the chairman (portfolio manager) first joined the Firm and the chairman's specific business experience during the past five years (although the chairman may have had portfolio management responsibilities for a longer period). Ms. Adamson has been chairman of the committee since 2015. She joined the Firm in 2002 and her investment experience dates from that time. She has served as a portfolio manager with the Firm throughout the past five years. The Statement of Additional Information provides additional information about the portfolio manager's compensation, other accounts managed by the portfolio manager, and the portfolio manager's ownership of the fund's shares.

The Management Fee

The management fee consists of two components—an "individual fund fee," which reflects the fund's particular characteristics, and a "group fee." The group fee, which is designed to reflect the benefits of the shared resources of the Firm, is calculated daily based on the combined net assets of all T. Rowe Price Funds (except the funds-of-funds, TRP Reserve Funds, Multi-Sector Account Portfolios, and any index or private-label mutual funds). The group fee schedule (in

the following table) is graduated, declining as the combined assets of the T. Rowe Price Funds rise, so shareholders benefit from the overall growth in mutual fund assets.

Group Fee Schedule

0.334%*	First \$50 billion
0.305%	Next \$30 billion
0.300%	Next \$40 billion
0.295%	Next \$40 billion
0.290%	Next \$60 billion
0.285%	Next \$80 billion
0.280%	Next \$100 billion
0.275%	Next \$100 billion
0.270%	Next \$150 billion
0.265%	Thereafter

* Represents a blended group fee rate containing various breakpoints.

The fund's group fee is determined by applying the group fee rate to the fund's average daily net assets. On October 31, 2018, the annual group fee rate was 0.29%. The individual fund fee, also applied to the fund's average daily net assets, is 0.75%.

Pursuant to any agreement under which T. Rowe Price has agreed to waive or pay for certain expenses in order to keep a class' expenses below a certain amount, the class-specific expense limitation could result in waiving expenses that have not been allocated to only that particular class (referred to as "Fundwide Expenses"). T. Rowe Price has agreed to pay or reimburse Fundwide Expenses for all classes of the fund in the same proportional amount. Since Fundwide Expenses may be waived for all classes in certain situations in order to keep one class at or below its contractual limitation, a particular class of the fund may benefit from another class' expense limitation regardless of whether that class has its own expense limitation. In such situations, Fundwide Expenses are subject to reimbursement (within three years of the waiver) to T. Rowe Price by the fund and each class whenever the class whose expense limitation resulted in the waiver of Fundwide Expenses is operating below its contractual expense limitation and such reimbursement will not cause the class' expense ratio (after the reimbursement is taken into account) to exceed the lower of the expense limitation in place at the time of the waiver or any expense limitation in place at the time of reimbursement. In addition, each class will only reimburse T. Rowe Price for its proportional share of Fundwide Expenses that were waived or paid.

A discussion about the factors considered by the Board and its conclusions in approving the fund's investment management agreement (and any subadvisory agreement, if applicable) appear in the fund's semiannual report to shareholders for the period ended April 30.

MORE INFORMATION ABOUT THE FUND'S PRINCIPAL INVESTMENT STRATEGIES AND ITS PRINCIPAL RISKS

Consider your investment goals, your time horizon for achieving them, and your tolerance for risk. The fund may be appropriate for you if you are seeking diversification for your equity investments and can accept the risks that accompany foreign investments. Your decision should take into account whether you have any other foreign stock investments. If you do not, you may want to consider investing in a more widely diversified fund to gain the broadest exposure to global opportunities. The fund may be appropriate if you seek to supplement a diversified international portfolio with a more concentrated investment and are comfortable with the potentially significant volatility associated with investing in emerging European markets.

The market may reward growth stocks with price increases when earnings expectations are met or exceeded. Funds that employ a growth-oriented approach to stock selection rely on the premise that by investing in companies that increase their earnings faster than both inflation and the overall economy, the market will eventually reward those companies with a higher stock price. The fund's successful implementation of a growth-oriented strategy may lead to long-term growth of capital over time.

Investing a portion of your overall portfolio in stock funds with foreign holdings can enhance your diversification and increase your available investment opportunities.

The fund invests primarily in various emerging European countries, including Eastern European countries, and typically invests significantly in Russia and Turkey. Focusing on emerging European countries provides the fund with the opportunity to seek strong growth in the areas the fund views as most promising, but with commensurately higher risks.

Portfolio managers closely monitor the fund's investments as well as political and economic trends in the countries and regions in which the fund invests. Holdings are adjusted according to the portfolio manager's analysis and outlook. The impact of unfavorable developments in a particular country may be reduced when investments are spread among many countries. However, the economies and financial markets of countries in a certain region may be heavily influenced by one another.

As with any mutual fund, there is no guarantee the fund will achieve its objective.

The principal risks associated with the fund's principal investment strategies include the following:

Risks of stock investing As with all stock funds, the fund's share price can fall because of weakness in one or more of its primary equity markets, a particular industry, or specific holdings. Stock markets can decline for many reasons, including adverse local, political, social, or economic developments; changes in investor psychology; or heavy institutional selling. The prospects for an industry or company may deteriorate because of a variety of factors, including disappointing earnings or changes in the competitive environment. In addition, the adviser's

assessment of companies whose stocks are held by the fund may prove incorrect, resulting in losses or poor performance, even in rising markets. Funds that invest overseas generally carry more risk than funds that invest strictly in U.S. assets.

Growth investment risks Growth stocks can be volatile for several reasons. Since these companies usually invest a high portion of earnings in their businesses, they may lack the dividends that can cushion stock prices in a falling market. Also, earnings disappointments often lead to sharply falling prices because investors buy growth stocks in anticipation of superior earnings growth.

Currency risks A decline in the value of a foreign currency versus the U.S. dollar could reduce the dollar value of securities denominated in that foreign currency. The overall impact on the fund's holdings can be significant, unpredictable, and long-lasting, depending on the currencies represented in the fund's portfolio and how each foreign currency appreciates or depreciates in relation to the U.S. dollar and whether currency positions are hedged. Under normal conditions, the funds do not engage in extensive foreign currency hedging programs. Further, since exchange rate movements are volatile, the fund's attempts at hedging could be unsuccessful, and it is not possible to effectively hedge the currency risks of many emerging market countries.

Other risks of foreign investing Risks can result from varying stages of economic and political development; differing regulatory environments, trading days and accounting standards; uncertain tax laws; and higher transaction costs of non-U.S. markets. Investments outside the U.S. could be subject to governmental actions such as capital or currency controls, nationalization of a company or industry, expropriation of assets, or imposition of high taxes. A trading market may close without warning for extended time periods, preventing the fund from buying or selling securities in that market.

Trading in the securities in which the fund invests may take place in various foreign markets on certain days when the fund is not open for business and does not calculate its net asset value. For example, the fund may invest in securities that trade in various foreign markets that are open on weekends. As the securities trade, their value may substantially change. As a result, the fund's net asset value may be significantly affected on days when shareholders cannot make transactions. In addition, market volatility may significantly limit the liquidity of securities of certain companies in a particular country or geographic region, or of all companies in the country or region. The fund may be unable to liquidate its positions in such securities at any time, or at a favorable price, in order to meet the fund's obligations.

Emerging markets risks Investments in emerging markets are subject to the risk of abrupt and severe price declines. The economic and political structures of emerging market countries, in most cases, do not compare favorably with the U.S. or other developed countries in terms of wealth and stability, and their financial markets often lack liquidity. These economies are less developed, can be overly reliant on particular industries, and are more vulnerable to the ebb and flow of international trade, trade barriers, and other protectionist or retaliatory measures. Governments in many emerging market countries participate to a significant degree in their

economies and securities markets. As a result, foreign investments may be restricted and subject to greater government control, including repatriation of sales proceeds. Emerging market securities exchanges are more likely to experience problems with the clearing and settling of trades, as well as the custody of holdings by local banks, agents, and depositories. In addition, the accounting standards in emerging market countries may be unreliable and could present an inaccurate picture of a company's finances. Some countries have histories of instability and upheaval that could cause their governments to act in a detrimental or hostile manner toward private enterprise or foreign investment. Investments in countries or regions that have recently begun moving away from central planning and state-owned industries toward free markets should be regarded as speculative.

While some countries have made progress in economic growth, liberalization, fiscal discipline, and political and social stability, there is no assurance these trends will continue. Significant risks, such as war and terrorism, currently affect some emerging market countries. The fund's performance will likely be hurt by exposure to nations in the midst of hyperinflation, currency devaluation, trade disagreements, sudden political upheaval, or interventionist government policies. The volatility of emerging markets may be heightened by the actions (such as significant buying or selling) of a few major investors. For example, substantial increases or decreases in cash flows of mutual funds investing in these markets could significantly affect local securities prices and, therefore, could cause fund share prices to decline.

All of these factors make investing in such countries significantly riskier than investing in other countries, and any one of these factors could cause the fund's share price to decline.

Geographic concentration risks Funds that are less diversified across geographic regions, countries, industries, or individual companies are generally riskier than more diversified funds. The performance of a fund that is less diversified will be closely tied to market, currency, economic, political, environmental, or regulatory conditions and developments in the countries, regions, or industries in which the fund invests and may be more volatile than the performance of a more diversified fund. The economies and financial markets of certain regions—such as Latin America, Asia, Europe, and the Middle East and Africa—can be interdependent and may all decline at the same time.

Risks of investing in emerging Europe Economic and political structures in many emerging European countries are in the early stages of economic development and developing rapidly, and such countries may lack the social, political, and economic stability characteristic of many more developed countries. In addition, the small size and inexperience of the securities markets in emerging European countries and the limited volume of trading in securities in those markets may make the fund's investments in such countries illiquid and more volatile than investments in more developed countries and may make obtaining prices on portfolio securities from independent sources more difficult than in other more developed markets. In the past, certain emerging European countries have failed to recognize private property rights and at times have nationalized or expropriated the assets of private companies. There may also be little financial or accounting information available with respect to companies located in

certain Eastern European countries, which, as a result, may make it difficult to assess the value or prospects of an investment in such companies.

The European financial markets have been experiencing volatility and adverse trends due to concerns about economic downturns or rising government debt levels in both emerging and developed European countries. These events have adversely affected currency exchange rates and may continue to significantly affect every country in Europe, including countries that do not use the euro. Defaults or restructurings by governments could have adverse effects on economies, financial markets, and asset valuations throughout Europe and lead to additional countries abandoning the euro or withdrawing from the European Union. During periods of instability or upheaval, a country's government may act in a detrimental or hostile manner toward private enterprise or foreign investment. In addition, at certain times, the fund may have to "fair value"—or assign a value on the basis of factors other than market quotations—to certain securities. Portfolio holdings that are valued using techniques other than market quotations, including "fair valued" securities, may be subject to greater fluctuation than if market quotations had been used, and there is no assurance that the fund could sell or close out a portfolio position for the value established for it at any time.

Risks of investing in Russia The fund's relatively high exposure to Russia subjects the fund to a higher degree of risk that adverse developments in a single country will negatively impact the fund. The fund is subject to the risk that Russia, which has been undergoing market-oriented reforms including a movement from centrally controlled ownership to privatization, may have unfavorable political developments, social instability, and/or significant changes in government policies. For example, military and political actions undertaken by Russia have prompted the U.S. and the regulatory bodies of certain other countries, as well as the European Union, to impose economic sanctions on certain Russian individuals and Russian companies. These sanctions can consist of prohibiting certain securities trades, certain private transactions in the energy sector, asset freezes and prohibition of all business, against certain Russian individuals and Russian companies. Such sanctions, and the continued disruption of the Russian economy, could severely impact the fund's performance.

Small- and mid-cap company risks To the extent the fund invests in small- and mid-capitalization stocks, it is likely to be more volatile than a fund that invests only in large companies. Small and medium-sized companies are generally riskier because they may have more limited product lines, less capital reserves, and less seasoned management, all of which could hinder their efforts to respond to economic, market, and industry changes. In addition, their securities may trade less frequently and with greater price swings.

Nondiversification risks Because the fund is nondiversified and thus can invest more of its assets in a smaller number of issuers, it may be more exposed to the risks associated with an individual issuer than a fund that invests more broadly across many issuers. For example, poor performance by a single large holding of the fund would adversely affect the fund's performance more than if the fund were invested in a larger number of issuers.

Industry risks To the extent the fund has significant investments in financial companies, it is more susceptible to adverse developments affecting such companies and may perform poorly during a downturn in that sector. Banks can be adversely affected by, among other things, regulatory changes, interest rate movements, the availability of capital and the cost to borrow, and the rate of debt defaults. Banks and other financial services institutions are often subject to extensive governmental regulation and intervention, and the potential for additional regulation could reduce profit margins and adversely affect the scope of their activities, increase the amount of capital they must maintain, and limit the amounts and types of loans and other financial commitments they can make. In addition, companies in the financial sector may also be adversely affected by decreases in the availability of money or asset valuations, credit rating downgrades, increased competition, and adverse conditions in other related markets.

The oversight of, and regulations applicable to, banks in emerging markets may be ineffective when compared with the regulatory frameworks for banks in developed markets. Banks in emerging markets may have significantly less access to capital than banks in more developed markets, leading them to be more likely to fail under adverse economic conditions. In addition, the impact of future regulation on any individual bank, or on the financial services sector as a whole, can be very difficult to predict.

To the extent the fund has significant investments in the energy sector, the fund's performance could be adversely affected by energy prices, supply-and-demand for energy resources, and various political, regulatory, and economic factors. Additionally, commodity prices may have a significant impact on the stock prices of energy companies.

Some of the principal tools the adviser uses to try to reduce overall risk include intensive research when evaluating a company's prospects and limiting exposure to certain industries, asset classes, or investment styles when appropriate.

In addition to the principal investment strategies and principal risks previously described, the fund may employ other investment strategies and may be subject to other risks, which include the following:

Additional strategies and risks While most assets will be invested in common stocks, other strategies may be employed that are not considered to be part of the fund's principal investment strategies. For instance, the fund may, to a limited extent, use derivatives such as futures contracts and forward currency exchange contracts. Any investments in futures would typically serve as an efficient means of gaining exposure to certain markets or as a cash management tool to maintain liquidity while being invested in the market. Forward currency exchange contracts would primarily be used to settle trades in a foreign currency or to help protect the fund's holdings from unfavorable changes in foreign currency exchange rates, although other currency hedging techniques may be used from time to time. To the extent the fund uses futures and forward currency exchange contracts, it is exposed to potential volatility and losses greater than direct investments in the contracts' underlying assets, and the risk that anticipated currency movements will not be accurately predicted.

Derivatives risks A derivative involves risks different from, and possibly greater than, the risks associated with investing directly in the assets on which the derivative is based. Derivatives can be highly volatile, illiquid, and difficult to value. Changes in the value of a derivative may not properly correlate with changes in the value of the underlying asset, reference rate, or index. The fund could be exposed to significant losses if it is unable to close a derivative position due to the lack of a liquid trading market. Derivatives involve the risk that a counterparty to the derivatives agreement will fail to make required payments or comply with the terms of the agreement. There is also the possibility that limitations or trading restrictions may be imposed by an exchange or government regulation, which could adversely impact the value and liquidity of a derivatives contract subject to such regulation.

Recent regulations have changed the requirements related to the use of certain derivatives. Some of these new regulations have limited the availability of certain derivatives and made their use by funds more costly. It is expected that additional changes to the regulatory framework will occur, but the extent and impact of additional new regulations are not certain at this time.

Cybersecurity risks The fund may be subject to operational and information security risks resulting from breaches in cybersecurity. Cybersecurity breaches may involve unauthorized access to the digital information systems (e.g., through “hacking” or malicious software coding) of the fund or its third-party service providers, but may also result from outside attacks such as denial-of-service attacks. These breaches may, among other things, result in financial losses to the fund and its shareholders, cause the fund to lose proprietary information, disrupt business operations, or result in the unauthorized release of confidential information. Further, cybersecurity breaches involving third-party service providers, trading counterparties, or issuers in which the fund invests could subject the fund to many of the same risks associated with direct breaches.

The Statement of Additional Information contains more detailed information about the fund and its investments, operations, and expenses.

INVESTMENT POLICIES AND PRACTICES

This section provides a more detailed description of the various types of portfolio holdings and investment practices that may be used by the fund to execute its overall investment program. Some of these holdings and investment practices are considered to be principal investment strategies of the fund and have already been described earlier in this prospectus. Any of the following holdings and investment practices that were not already described in Section 1 of this prospectus are not considered part of the fund’s principal investment strategies, but they may be used by the fund to help achieve its investment objective. The fund’s investments may be subject to further restrictions and risks described in the Statement of Additional Information.

Shareholder approval is required to substantively change the fund's investment objective. Shareholder approval is also required to change certain investment restrictions noted in the following section as "fundamental policies." Portfolio managers also follow certain "operating policies" that can be changed without shareholder approval. Shareholders will receive at least 60 days' prior notice of a change in the fund's policy requiring it to normally invest at least 80% of its net assets in the emerging markets of Europe.

The fund's holdings in certain kinds of investments cannot exceed maximum percentages as set forth in this prospectus and the Statement of Additional Information. For instance, there are limitations regarding the fund's investments in certain types of derivatives. While these restrictions provide a useful level of detail about the fund's investments, investors should not view them as an accurate gauge of the potential risk of such investments. For example, in a given period, a 5% investment in derivatives could have a significantly greater impact on the fund's share price than its weighting in the portfolio. The net effect of a particular investment depends on its volatility and the size of its overall return in relation to the performance of all of the fund's investments.

Certain investment restrictions, such as a required minimum or maximum investment in a particular type of security, are measured at the time the fund purchases a security. The status, market value, maturity, duration, credit quality, or other characteristics of the fund's securities may change after they are purchased, and this may cause the amount of the fund's assets invested in such securities to exceed the stated maximum restriction or fall below the stated minimum restriction. If any of these changes occur, it would not be considered a violation of the investment restriction and will not require the sale of an investment if it was proper at the time the investment was made (this exception does not apply to the fund's borrowing policy). However, certain changes will require holdings to be sold or purchased by the fund during the time it is above or below the stated percentage restriction in order for the fund to be in compliance with applicable restrictions.

For purposes of determining whether the fund invests at least 80% of its net assets in securities of issuers that are located in or that have economic ties to emerging European markets, the fund relies on MSCI Inc., a third-party provider of benchmark indexes and data services, to determine whether a country is an emerging market and relies on the country assigned to a security by MSCI Inc. or another unaffiliated data provider. The data providers use various criteria to determine the country to which a security is economically tied. Examples include the following: (1) the country under which the issuer is organized; (2) the location of the issuer's principal place of business or principal office; (3) where the issuer's securities are listed or traded principally on an exchange or over-the-counter market; and (4) where the issuer conducts the predominant part of its business activities or derives a significant portion (e.g., at least 50%) of its revenues or profits.

Changes in the fund's holdings, the fund's performance, and the contribution of various investments to the fund's performance are discussed in the shareholder reports.

Portfolio managers have considerable discretion in choosing investment strategies and selecting securities they believe will help achieve the fund's objective.

Types of Portfolio Securities

In seeking to meet its investment objective, the fund may invest in any type of security or instrument (including certain potentially high-risk derivatives described in this section) whose investment characteristics are consistent with its investment program. The following pages describe various types of the fund's holdings and investment management practices, some of which are also described as part of the fund's principal investment strategies.

Industry Concentration As a matter of fundamental policy, the fund may not purchase the securities of any issuer (other than securities issued or guaranteed by the U.S. government or any of its agencies or instrumentalities) if, as a result, more than 25% of the fund's net assets would be invested in the securities of companies whose principal business activities are in the same industry, except that the fund may purchase the securities of any issuer if, as a result, no more than 35% of the fund's net assets would be invested in any industry that accounts for more than 20% of the emerging European market as a whole, as measured by an index determined by T. Rowe Price to be an appropriate measure of the emerging European market. The fund is currently referencing the MSCI Emerging Markets Europe Index to measure whether any particular industry accounts for more than 20% of the emerging European market as a whole.

Nondiversified Status

The fund is a nondiversified mutual fund. This means that the fund may invest a greater portion of its assets in, and own a greater amount of the voting securities of, a single issuer than a diversified fund, which may subject the fund to greater risk with respect to its portfolio securities and greater volatility with respect to its share price.

The fund, however, intends to qualify as a "regulated investment company" under the Internal Revenue Code. As a result, the fund must invest so that, at the end of each fiscal quarter, with respect to 50% of its total assets, no more than 5% of its total assets is invested in the securities of a single issuer and not more than 10% of the voting securities of any issuer are held by the fund. With respect to the remaining 50% of the fund's assets, no more than 25% may be invested in a single issuer.

The fund's investments are primarily in common stocks and, to a lesser degree, other types of securities as follows:

Common and Preferred Stocks

Stocks represent shares of ownership in a company. Generally, preferred stocks have a specified dividend rate and rank after bonds and before common stocks in their claim on income for dividend payments and on assets should the company be liquidated. After other claims are satisfied, common stockholders participate in company profits on a pro-rata basis and profits may be paid out in dividends or reinvested in the company to help it grow. Increases and decreases in earnings are usually reflected in a company's stock price, so common stocks generally have the greatest appreciation and depreciation potential of all corporate securities.

Unlike common stock, preferred stock does not ordinarily carry voting rights. While most preferred stocks pay a dividend, the fund may decide to purchase preferred stock where the issuer has suspended, or is in danger of suspending, payment of its dividend. The fund may purchase American Depositary Receipts and Global Depositary Receipts, which are certificates evidencing ownership of shares of a foreign issuer. American Depositary Receipts and Global Depositary Receipts trade on established markets and are alternatives to directly purchasing the underlying foreign securities in their local markets and currencies. Such investments are subject to many of the same risks associated with investing directly in foreign securities. For purposes of the fund's investment policies, investments in depositary receipts are deemed to be investments in the underlying securities. For example, a depositary receipt representing ownership of common stock will be treated as common stock.

Convertible Securities and Warrants

The fund may invest in debt instruments or preferred equity securities that are convertible into, or exchangeable for, equity securities at specified times in the future and according to a certain exchange ratio. Convertible bonds are typically callable by the issuer, which could in effect force conversion before the holder would otherwise choose. Traditionally, convertible securities have paid dividends or interest at rates higher than common stocks but lower than nonconvertible securities. They generally participate in the appreciation or depreciation of the underlying stock into which they are convertible, but to a lesser degree than common stock. Some convertible securities combine higher or lower current income with options and other features. Warrants are options to buy, directly from the issuer, a stated number of shares of common stock at a specified price anytime during the life of the warrants (generally, two or more years). Warrants have no voting rights, pay no dividends, and can be highly volatile. In some cases, the redemption value of a warrant could be zero.

Participation Notes (P-notes)

The fund may gain exposure to securities traded in foreign markets through investments in P-notes. P-notes are generally issued by banks or broker-dealers and are designed to offer a return linked to an underlying common stock or other security. An investment in a P-note involves additional risks beyond the risks normally associated with a direct investment in the underlying security. While the holder of a P-note is entitled to receive from the broker-dealer or bank any dividends paid by the underlying security, the holder is not entitled to the same rights (e.g., voting rights) as a direct owner of the underlying security. P-notes are considered general unsecured contractual obligations of the banks or broker-dealers that issue them as the counterparty. As such, the fund must rely on the creditworthiness of the counterparty for its investment returns on the P-notes, and could lose the entire value of its investment in the event of default by a counterparty. Additionally, there is no assurance that there will be a secondary trading market for a P-note or that the trading price of a P-note will equal the value of the underlying security.

Operating policy The fund's investments in P-notes are limited to 20% of its total assets. Investments in P-notes are not subject to the limit on investments in hybrid instruments.

Fixed Income Securities

From time to time, the fund may invest in corporate and government fixed income securities as well as below investment-grade bonds, commonly referred to as “junk” bonds. Corporate fixed income securities would be purchased in companies that meet the fund’s investment criteria. The price of a fixed income security fluctuates with changes in interest rates, generally rising when interest rates fall and falling when interest rates rise. Below investment-grade bonds, or “junk” bonds, can be more volatile and have greater risk of default than investment-grade bonds, and should be considered speculative.

Operating policy The fund may invest up to 10% of its total assets in below investment-grade bonds. The fund’s investments in convertible securities are not subject to this limit.

Futures and Options

Futures are often used to establish exposures or manage or hedge risk because they enable the investor to buy or sell an asset in the future at an agreed-upon price. Options may be used to generate additional income, to enhance returns, or as a defensive technique to protect against anticipated declines in the value of an asset. Call options give the investor the right to purchase (when the investor purchases the option), or the obligation to sell (when the investor “writes” or sells the option), an asset at a predetermined price in the future. Put options give the purchaser of the option the right to sell, or the seller (or “writer”) of the option the obligation to buy, an asset at a predetermined price in the future. Futures and options contracts may be bought or sold for any number of reasons, including to manage exposure to changes in interest rates, bond prices, foreign currencies, and credit quality; as an efficient means of increasing or decreasing the fund’s exposure to certain markets; in an effort to enhance income; to improve risk-adjusted returns; to protect the value of portfolio securities; and to serve as a cash management tool. Call or put options may be purchased or sold on securities, futures, financial indexes, and foreign currencies. The fund may choose to continue a futures contract by “rolling over” an expiring futures contract into an identical contract with a later maturity date. This could increase the fund’s transaction costs and portfolio turnover rate.

Futures and options contracts may not always be successful investments or hedges; their prices can be highly volatile; using them could lower the fund’s total return; the potential loss from the use of futures can exceed the fund’s initial investment in such contracts; and the losses from certain options written by the fund could be unlimited.

Operating policies Initial margin deposits on futures and premiums on options used for non-hedging purposes will not exceed 5% of the fund’s net asset value. The total market value of securities covering call or put options may not exceed 25% of the fund’s total assets. No more than 5% of the fund’s total assets will be committed to premiums when purchasing call or put options.

Hybrid Instruments

Hybrid instruments (a type of potentially high-risk derivative) can combine the characteristics of securities, futures, and options. For example, the principal amount, redemption, or conversion terms of a security could be related to the market price of some commodity,

currency, security, or securities index. Such instruments may or may not bear interest or pay dividends. Under certain conditions, the redemption value of a hybrid could be zero.

Hybrids can have volatile prices and limited liquidity, and their use may not be successful.

Operating policy The fund's investments in hybrid instruments are limited to 10% of its total assets.

Currency Derivatives

The fund will normally conduct any foreign currency exchange transactions either on a spot (i.e., cash) basis at the spot rate prevailing in the foreign currency exchange market, or through entering into forward contracts to purchase or sell foreign currencies. The fund will generally not enter into a forward contract with a term greater than one year. The fund may enter into forward currency exchange contracts to "lock in" the U.S. dollar price of a security when it enters into a contract for the purchase or sale of a security denominated in a foreign currency, and when the fund believes that the currency of a particular foreign country may move substantially against another currency, it may enter into a forward contract to sell or buy the former foreign currency.

A fund that invests in foreign securities may attempt to hedge its exposure to potentially unfavorable currency changes. The primary means of doing this is through the use of forward currency exchange contracts, which are contracts between two counterparties to exchange one currency for another on a future date at a specified exchange rate. The fund may also use these instruments to create a synthetic bond, which is issued in one currency with the currency component transformed into another currency. However, futures, swaps, and options on foreign currencies may also be used. In certain circumstances, the fund may use currency derivatives to substitute a different currency for the currency in which the investment is denominated, a strategy known as proxy hedging. If the fund were to engage in any of these foreign currency transactions, it could serve to protect its foreign securities from adverse currency movements relative to the U.S. dollar, although the fund may also use currency derivatives in an effort to gain exposure to a currency expected to appreciate in value versus other currencies. As a result, the fund could be invested in a currency without holding any securities denominated in that currency. Such transactions involve, among other risks, the risk that anticipated currency movements will not occur, which could reduce the fund's total return. There are certain markets, including many emerging markets, where it is not possible to engage in effective foreign currency hedging.

Hedging may result in the application of the mark-to-market and straddle provisions of the Internal Revenue Code. These provisions could result in an increase (or decrease) in the amount of taxable dividends paid by the fund and could affect whether dividends paid by the fund are classified as capital gains or ordinary income.

Investments in Other Investment Companies

The fund may invest in other investment companies, including open-end funds, closed-end funds, and exchange-traded funds.

The fund may purchase the securities of another investment company to temporarily gain exposure to a portion of the market while awaiting the purchase of securities or as an efficient means of gaining exposure to a particular asset class. The fund might also purchase shares of another investment company to gain exposure to the securities in the investment company's portfolio at times when the fund may not be able to buy those securities directly. Any investment in another investment company would be consistent with the fund's objective and investment program.

The risks of owning another investment company are generally similar to the risks of investing directly in the securities in which that investment company invests. However, an investment company may not achieve its investment objective or execute its investment strategy effectively, which may adversely affect the fund's performance. In addition, because closed-end funds and exchange-traded funds trade on a secondary market, their shares may trade at a premium or discount to the actual net asset value of their portfolio securities and their shares may have greater volatility if an active trading market does not exist.

As a shareholder of another investment company, the fund must pay its pro-rata share of that investment company's fees and expenses. The fund's investments in non-T. Rowe Price investment companies are subject to the limits that apply to investments in other funds under the Investment Company Act of 1940 or under any applicable exemptive order.

The fund may also invest in certain other T. Rowe Price Funds as a means of gaining efficient and cost-effective exposure to certain asset classes, provided the investment is consistent with the fund's investment program and policies.

Investments in other investment companies could allow the fund to obtain the benefits of a more diversified portfolio than might otherwise be available through direct investments in a particular asset class, and will subject the fund to the risks associated with the particular asset class or asset classes in which an underlying fund invests. Examples of asset classes in which other mutual funds (including T. Rowe Price Funds) focus their investments include high yield bonds, inflation-linked securities, floating rate loans, international bonds, emerging market bonds, stocks of companies involved in activities related to real assets, stocks of companies that focus on a particular industry or sector, and emerging market stocks. If the fund invests in another T. Rowe Price Fund, the management fee paid by the fund will be reduced to ensure that the fund does not incur duplicate management fees as a result of its investment.

Illiquid Investments

Some of the fund's holdings may be considered illiquid because they may not reasonably be expected to be sold or disposed of in current market conditions in seven calendar days or less without the sale or disposition significantly changing the market value of the investment. The determination of liquidity involves a variety of factors. Illiquid securities may include private placements that are sold directly to a small number of investors, usually institutions. Unlike

public offerings, such securities are not registered with the SEC. Although certain of these securities may be readily sold (for example, pursuant to Rule 144A under the Securities Act of 1933) and therefore deemed liquid, others may have resale restrictions and be considered illiquid. The sale of illiquid securities may involve substantial delays and additional costs, and the fund may only be able to sell such securities at prices substantially lower than what it believes they are worth.

Operating policy The fund may not purchase an illiquid security if it holds 15% or more of its net assets in illiquid securities.

Types of Investment Management Practices

Reserve Position

A certain portion of the fund's assets may be held in reserves. The fund's reserve positions will primarily consist of: (1) shares of a T. Rowe Price internal money market fund or short-term bond fund (which do not charge any management fees); (2) short-term, high-quality U.S. and foreign dollar-denominated money market securities, including repurchase agreements; and (3) U.S. dollar or non-U.S. dollar currencies. In order to respond to adverse market, economic, political, or other conditions, the fund may assume a temporary defensive position that is inconsistent with its principal investment objective and/or strategies and may invest, without limitation, in reserves. If the fund has significant holdings in reserves, it could compromise its ability to achieve its objective. The reserve position provides flexibility in meeting redemptions, paying expenses, and managing cash flows into the fund and can serve as a short-term defense during periods of unusual market volatility. Non-U.S. dollar reserves are subject to currency risk.

Borrowing Money and Transferring Assets

The fund may borrow from banks, other persons, and other T. Rowe Price Funds for temporary or emergency purposes, to facilitate redemption requests, or for other purposes consistent with the fund's policies as set forth in this prospectus and the Statement of Additional Information. Such borrowings may be collateralized with the fund's assets, subject to certain restrictions.

Fundamental policy Borrowings may not exceed 33 $\frac{1}{3}$ % of the fund's total assets. This limitation includes any borrowings for temporary or emergency purposes, applies at the time of the transaction, and continues to the extent required by the Investment Company Act of 1940.

Operating policy The fund will not transfer portfolio securities as collateral except as necessary in connection with permissible borrowings or investments, and then such transfers may not exceed 33 $\frac{1}{3}$ % of its total assets. The fund will not purchase additional securities when its borrowings exceed 5% of its total assets.

Meeting Redemption Requests

We expect that the fund will hold cash or cash equivalents to meet redemption requests. The fund may also use the proceeds from the sale of portfolio securities to meet redemption requests if consistent with the management of the fund. These redemption methods will be

used regularly and may also be used in deteriorating or stressed market conditions. The fund reserves the right to pay redemption proceeds with securities from the fund's portfolio rather than in cash ("redemptions in-kind"), as described under "Large Redemptions." Redemptions in-kind are typically used to meet redemption requests that represent a large percentage of the fund's net assets in order to minimize the effect of large redemptions on the fund and its remaining shareholders. In general, any redemptions in-kind will represent a pro-rata distribution of the fund's securities, subject to certain limited exceptions. Redemptions in-kind may be used regularly in circumstances as described above and may also be used in stressed market conditions.

The fund, along with other T. Rowe Price Funds, is a party to an interfund lending exemptive order received from the SEC that permits the T. Rowe Price Funds to borrow money from and/or lend money to other T. Rowe Price Funds to help the funds meet short-term redemptions and liquidity needs.

During periods of deteriorating or stressed market conditions, when an increased portion of the fund's portfolio may be composed of holdings with reduced liquidity or lengthy settlement periods, or during extraordinary or emergency circumstances, the fund may be more likely to pay redemption proceeds with cash obtained through interfund lending or short-term borrowing arrangements (if available), or by redeeming a large redemption request in-kind.

Lending of Portfolio Securities

The fund may lend its securities to broker-dealers, other institutions, or other persons to earn additional income. Risks include the potential insolvency of the broker-dealer or other borrower that could result in delays in recovering securities and capital losses. Additionally, losses could result from the reinvestment of collateral received on loaned securities in investments that decline in value, default, or do not perform as well as expected.

Fundamental policy The value of loaned securities may not exceed 33¹/₃% of the fund's total assets.

Portfolio Turnover

Turnover is an indication of frequency of trading. Each time the fund purchases or sells a security, it incurs a cost. This cost is reflected in the fund's net asset value but not in its operating expenses. The higher the turnover rate, the higher the transaction costs and the greater the impact on the fund's total return. Higher turnover can also increase the possibility of taxable capital gain distributions. The fund's portfolio turnover rates are shown in the Financial Highlights tables.

FINANCIAL HIGHLIGHTS

The Financial Highlights tables, which provides information about each class' financial history, are based on a single share outstanding throughout the periods shown. The tables are part of the fund's financial statements, which are included in its annual report and are incorporated by

reference into the Statement of Additional Information (available upon request). The financial statements in the annual report were audited by the fund's independent registered public accounting firm, PricewaterhouseCoopers LLP.

DISCLOSURE OF FUND PORTFOLIO INFORMATION

The T. Rowe Price Funds' full portfolio holdings as of their fiscal year-ends are disclosed in their annual shareholder reports and their full portfolio holdings as of their fiscal mid-point are

disclosed in their semiannual shareholder reports. The annual and semiannual shareholder reports are filed with the SEC and sent to the funds' shareholders within 60 days of the period covered. The shareholder reports are publicly available immediately upon filing with the SEC. Beginning with reporting periods ending on or after March 1, 2019, the T. Rowe Price Funds also publicly disclose their full portfolio holdings as of their first and third fiscal quarter-ends on Form N-PORT, along with other fund information. Form N-PORT is filed with the SEC monthly, and the fund's full portfolio holdings as of its first and third fiscal quarter-ends are made publicly available 60 days after the end of each quarter. Prior to March 1, 2019, the T. Rowe Price Funds disclosed their full portfolio holdings for their first and third fiscal quarter-ends on Form N-Q, which was filed with the SEC within 60 days of the period covered and made publicly available immediately upon filing with the SEC. Neither Form N-PORT nor Form N-Q are sent to the funds' shareholders. Under certain conditions, the shareholder reports, Form N-PORT, and Form N-Q may include up to 5% of a fund's holdings under the caption "Miscellaneous Securities" without identifying the specific security or issuer. Generally, a holding would not be individually identified if it is determined that its disclosure could be harmful to the fund or its shareholders. A holding will not be excluded for these purposes from a fund's SEC filings for more than one year. The money market funds also file detailed month-end portfolio holdings information on Form N-MFP with the SEC each month. Form N-MFP is publicly available immediately upon filing with the SEC.

In addition, most T. Rowe Price Funds disclose their calendar quarter-end full portfolio holdings on **troweprice.com** 15 calendar days after each quarter. At the discretion of the investment adviser, these holdings reports may exclude the issuer name and other information relating to a holding in order to protect the fund's interests and prevent harm to the fund or its shareholders. Private placements and other restricted securities may not be individually identified in the calendar quarter-end holdings on **troweprice.com**, but would be disclosed in any SEC filings. Money market funds also disclose on **troweprice.com** their month-end full portfolio holdings five business days after each month-end and historical information about the fund's investments for the previous six months, as of the last business day of the preceding month. This information includes, among other things, the percentage of the fund's investments in daily and weekly liquid assets, the fund's weighted average maturity and weighted average life, the fund's market-based net asset value, and the fund's net inflows and outflows. The calendar quarter-end portfolio holdings will remain on the website for one year and the month-end money market fund portfolio holdings will remain on the website for six months. In addition, most T. Rowe Price Funds disclose their 10 largest holdings on **troweprice.com** on the seventh business day after each month-end. These holdings are listed in alphabetical order along with the aggregate percentage of the fund's total assets that these 10 holdings represent. Each monthly top 10 list will remain on the website for six months. A description of T. Rowe Price's policies and procedures with respect to the disclosure of portfolio information is available in the Statement of Additional Information.

The following policies and procedures generally apply to Investor Class, I Class, Advisor Class, and R Class accounts in the T. Rowe Price Funds.

INVESTING WITH T. ROWE PRICE

This section of the prospectus explains the basics of investing with T. Rowe Price and describes some of the different share classes that may be available. Certain share classes can be held directly with T. Rowe Price, while other share classes must typically be held through a financial intermediary, such as a bank, broker, retirement plan recordkeeper, or investment adviser.

AVAILABLE SHARE CLASSES

Each class of a fund's shares represents an interest in the same fund with the same investment program and investment policies. However, each class is designed for a different type of investor and has a different cost structure primarily due to shareholder services or distribution arrangements that may apply only to that class. For example, certain classes may make payments to financial intermediaries for various administrative services they provide (commonly referred to as administrative fee payments, or AFP) and/or make payments to certain financial intermediaries for distribution of the fund's shares (commonly referred to as 12b-1 fee payments). Determining the most appropriate share class depends on many factors, including how much you plan to invest, whether you are investing directly in the fund or through a financial intermediary, and whether you are investing on behalf of a person or an organization.

This section generally describes the differences between Investor Class, I Class, Advisor Class, and R Class shares. This section does not describe the policies that apply to accounts in T. Rowe Price institutional funds and certain other types of funds. Policies for these other funds are described in their respective prospectuses, and all available share classes for the T. Rowe Price Funds are described more fully in the funds' Statement of Additional Information. While many T. Rowe Price Funds are offered in more than one share class, not all funds are offered in the share classes described in this section. The front cover and Section 1 of this prospectus indicate which share classes are available for the fund.

Investor Class

A T. Rowe Price Fund that does not include the term "institutional" or indicate a specific share class as part of its name is considered to be the Investor Class of that fund. The Investor Class is available to individual investors, institutions, and a wide variety of other types of investors. The Investor Class may be purchased directly from T. Rowe Price or through a retirement plan or financial intermediary. The Investor Class does not impose sales charges and does not make

any 12b-1 fee payments to financial intermediaries but may make administrative fee payments at an annual rate of up to 0.15% of the class' average daily net assets. In addition, you may also incur brokerage commissions and other charges when buying or selling Investor Class shares through a financial intermediary. For investors holding the Investor Class through the T. Rowe Price ActivePlus Portfolios[®] program, the terms and conditions of the program will be applicable.

I Class

The I Class may be purchased directly from T. Rowe Price or through a financial intermediary. The I Class does not impose sales charges and does not make any administrative fee payments or 12b-1 fee payments to financial intermediaries. However, you may incur brokerage commissions and other charges when buying or selling I Class shares through a financial intermediary.

The I Class requires a \$1 million initial investment minimum, although the minimum generally is waived for retirement plans, financial intermediaries, certain client accounts for which T. Rowe Price or its affiliate has discretionary investment authority, and certain other accounts. For investors eligible for the I Class through the T. Rowe Price ActivePlus Portfolios program, the terms and conditions of the program will be applicable. Accounts that are not eligible for the I Class may be converted to the Investor Class following notice to the financial intermediary or investor.

Advisor Class

The Advisor Class is designed to be sold through various financial intermediaries, such as broker-dealers, banks, insurance companies, retirement plan recordkeepers, and financial advisors. The Advisor Class must be purchased through an eligible financial intermediary (except for certain retirement plans held directly with T. Rowe Price). The Advisor Class does not impose sales charges but may make 12b-1 fee payments at an annual rate of up to 0.25% of the class' average daily net assets and may also separately make administrative fee payments at an annual rate of up to 0.15% of the class' average daily net assets.

The Advisor Class requires an agreement between the financial intermediary and T. Rowe Price to be executed prior to investment. Purchases of Advisor Class shares for which the required agreement with T. Rowe Price has not been executed or that are not made through an eligible financial intermediary are subject to rejection or cancellation without prior notice to the financial intermediary or investor, and accounts that are no longer eligible for the Advisor Class may be converted to the Investor Class following notice to the financial intermediary or investor.

R Class

The R Class is designed to be sold through financial intermediaries for employer-sponsored defined contribution retirement plans and certain other accounts. The R Class must be purchased through an eligible financial intermediary (except for certain retirement plans held directly with T. Rowe Price). The R Class does not impose sales charges but may make 12b-1 fee payments at an annual rate of up to 0.50% of the class' average daily net assets and may also

separately make administrative fee payments at an annual rate of up to 0.15% of the class' average daily net assets.

The R Class requires an agreement between the financial intermediary and T. Rowe Price to be executed prior to investment. Purchases of R Class shares for which the required agreement with T. Rowe Price has not been executed or that are not made through an eligible financial intermediary are subject to rejection or cancellation without prior notice to the financial intermediary or investor, and accounts that are no longer eligible for the R Class may be converted to the Investor Class or Advisor Class following notice to the financial intermediary or investor.

DISTRIBUTION AND SHAREHOLDER SERVICING FEES

Administrative Fee Payments (Investor Class, Advisor Class, and R Class)

Certain financial intermediaries perform recordkeeping and administrative services for their clients that would otherwise be performed by the funds' transfer agent. T. Rowe Price Funds (other than I Class shares) may make administrative fee payments to retirement plan recordkeepers, broker-dealers, and other financial intermediaries (at an annual rate of up to 0.15% of the fund's average daily net assets) for transfer agency, recordkeeping, and other administrative services that they provide on behalf of the funds. These administrative services may include maintaining account records for each customer; transmitting purchase and redemption orders; delivering shareholder confirmations, statements, and tax forms; and providing support to respond to customers' questions regarding their accounts. Except for funds that have an all-inclusive management fee, these separate administrative fee payments are reflected in the "Other expenses" line that appears in a fund's fee table in Section 1.

12b-1 Fee Payments (Advisor Class and R Class)

Mutual funds are permitted to adopt a 12b-1 plan to pay certain expenses associated with the distribution of the fund's shares out of the fund's assets. Each fund offering Advisor and/or R Class shares has adopted a 12b-1 plan under which those classes may make payments (for the Advisor Class, at an annual rate of up to 0.25% of the class' average daily net assets, and for the R Class, at an annual rate of up to 0.50% of the class' average daily net assets) to various financial intermediaries, such as brokers, banks, insurance companies, investment advisers, and retirement plan recordkeepers for distribution and/or shareholder servicing of the Advisor and R Class shares. The 12b-1 plans provide for the class to pay such fees to the fund's distributor and for the distributor to then pay such fees to the financial intermediaries that provide services for the class and/or make the class available to investors.

For the Advisor Class, distribution payments may include payments to financial intermediaries for making the Advisor Class shares available to their customers (for example, providing the fund with "shelf space" or inclusion on a "preferred list" or "supermarket" platform). For the R Class, distribution payments may include payments to financial intermediaries for making the R Class shares available as investment options to retirement plans and retirement plan

participants, assisting plan sponsors in conducting searches for investment options, and providing ongoing monitoring of investment options.

Shareholder servicing payments under the plans may include payments to financial intermediaries for providing shareholder support services to existing shareholders of the Advisor and R Class. These payments may be more or less than the costs incurred by the financial intermediaries. Because the fees are paid from the Advisor Class or R Class net assets on an ongoing basis, they will increase the cost of your investment over time. In addition, payments of 12b-1 fees may influence your financial advisor's recommendation of the fund or of any particular share class of the fund. Payments of 12b-1 fees are reflected in the "Distribution and service (12b-1) fees" line that appears in a fund's fee table in Section 1.

Additional Compensation to Financial Intermediaries

In addition to the AFP payments made by certain funds and the 12b-1 payments made by each Advisor and R Class, T. Rowe Price or the fund's distributor will, at their own expense, provide compensation to certain financial intermediaries that have sold shares of or provide shareholder or other services to the T. Rowe Price Funds, commonly referred to as revenue sharing. These payments may be in the form of asset-based, transaction-based, or flat payments. These payments are used to compensate third parties for distribution and shareholder servicing activities, including sub-accounting, sub-transfer agency, or other services. Some of these payments may include expense reimbursements and meeting and marketing support payments (out of T. Rowe Price's or the fund's distributor's own resources and not as an expense of the funds) to financial intermediaries, such as broker-dealers, registered investment advisers, banks, insurance companies, and retirement plan recordkeepers, in connection with the sale, distribution, marketing, and/or servicing of the T. Rowe Price Funds. The Statement of Additional Information provides more information about these payment arrangements.

The receipt of, or the prospect of receiving, these payments and expense reimbursements from T. Rowe Price or the fund's distributor may influence intermediaries, plan sponsors, and other third parties to offer or recommend T. Rowe Price Funds over other investment options for which an intermediary does not receive additional compensation (or receives lower levels of additional compensation). In addition, financial intermediaries that receive these payments and/or expense reimbursements may elevate the prominence of the T. Rowe Price Funds by, for example, placing the T. Rowe Price Funds on a list of preferred or recommended funds and/or provide preferential or enhanced opportunities to promote the T. Rowe Price Funds in various ways. Since these additional payments are not paid by a fund directly, these arrangements do not increase fund expenses and will not change the price that an investor pays for shares of the T. Rowe Price Funds or the amount that is invested in a T. Rowe Price Fund on behalf of an investor. You may ask your financial intermediary for more information about any payments they receive from T. Rowe Price or the fund's distributor.

Comparison of Fees

The following table summarizes the distribution and shareholder servicing fee arrangements applicable to each class.

Class	12b-1 Fee Payments	Administrative Fee Payments
Investor Class	None	Up to 0.15% per year
I Class	None	None
Advisor Class	Up to 0.25% per year	Up to 0.15% per year
R Class	Up to 0.50% per year	Up to 0.15% per year

ACCOUNT SERVICE FEE

Investor Class

In an effort to help offset the disproportionately high costs incurred by the funds in connection with servicing lower-balance accounts that are held directly with the T. Rowe Price Funds' transfer agent, an annual \$20 account service fee (paid to T. Rowe Price Services, Inc., or one of its affiliates) is charged to certain Investor Class accounts with a balance below \$10,000. The determination of whether a fund account is subject to the account service fee is based on account balances and services selected for accounts as of the last business day of August of each calendar year. The fee may be charged to an account with a balance below \$10,000 for any reason, including market fluctuation and recent redemptions. The fee, which is automatically deducted from an account by redeeming fund shares, is typically charged to accounts in early September each calendar year. Such redemption may result in a taxable gain or loss to you.

The account service fee generally does not apply to fund accounts that are held through a financial intermediary, participant accounts in employer-sponsored retirement plans for which T. Rowe Price Retirement Plan Services provides recordkeeping services, accounts held through the T. Rowe Price ActivePlus Portfolios program, or money market funds that are used as a T. Rowe Price Brokerage sweep account. Regardless of a particular fund account's balance on the last business day of August, the account service fee is automatically waived for accounts that satisfy any of the following conditions:

- Any accounts for which the shareholder has elected to receive electronic delivery of all of the following: account statements, transaction confirmations, prospectuses, and shareholder reports (paper copies of fund documents are available, free of charge, upon request, to any shareholder regardless of whether the shareholder has elected electronic delivery);
- Any accounts of a shareholder with at least \$50,000 in total assets with T. Rowe Price (for this purpose, total assets include investments through T. Rowe Price Brokerage and investments in T. Rowe Price Funds, except for those held through a retirement plan for which T. Rowe Price Retirement Plan Services provides recordkeeping services); or
- Any accounts of a shareholder who is a T. Rowe Price Select Client Services—visit troweprice.com or call 1-800-225-3222 for more information.

T. Rowe Price reserves the right to authorize additional waivers for other types of accounts or to modify the conditions for assessment of the account service fee. Fund shares held in a T. Rowe Price IRA, Education Savings Account, or small business retirement plan account (including certain 403(b) plan accounts) are subject to the account service fee and may be subject to additional administrative fees when distributing all fund shares from such accounts.

POLICIES FOR OPENING AN ACCOUNT

Investor and I Class shares may be purchased directly from T. Rowe Price or through various financial intermediaries. Advisor and R Class shares must be purchased through a financial intermediary (except for certain retirement plans held directly at T. Rowe Price). If you are opening an account through an employer-sponsored retirement plan or other financial intermediary, you should contact the retirement plan or financial intermediary for information regarding its policies on opening an account, including the policies relating to purchasing, exchanging, and redeeming shares, and the applicable initial and subsequent investment minimums.

Tax Identification Number

Investors must provide T. Rowe Price with a valid Social Security number or taxpayer identification number on a signed new account form or Form W-9, and financial intermediaries must provide T. Rowe Price with their certified taxpayer identification number. Otherwise, federal law requires the funds to withhold a percentage of dividends, capital gain distributions, and redemptions and may subject you or the financial intermediary to an Internal Revenue Service fine. If this information is not received within 60 days of the account being established, the account may be redeemed at the fund's then-current net asset value.

Important Information Required to Open a New Account

Pursuant to federal law, all financial institutions must obtain, verify, and record information that identifies each person or entity that opens an account. This information is needed not only for the account owner and any other person who opens the account, but also for any person who has authority to act on behalf of the account.

When you open an account, you will be asked for the name, U.S. street address (post office boxes are not acceptable), date of birth, and Social Security number or taxpayer identification number for each account owner and person(s) opening an account on behalf of others, such as custodians, agents, trustees, or other authorized signers. When opening an entity account, you will be asked to identify and provide personal information for: (i) any individual who, either directly or indirectly, owns 25% or more of the equity interest of the entity and (ii) a single individual who controls, manages, or directs the entity. Corporate and other institutional accounts require documents showing the existence of the entity (such as articles of incorporation or partnership agreements) to open an account. Certain other fiduciary accounts (such as trusts or power of attorney arrangements) require documentation, which may include an original or certified copy of the trust agreement or power of attorney, to open an account.

T. Rowe Price will use this information to verify the identity of the person(s)/entity opening the account. An account cannot be opened until all of this information is received. If the identity of the account holder cannot be verified, T. Rowe Price is authorized to take any action permitted by law. (See “Rights Reserved by the Funds” later in this section.)

Institutional investors and financial intermediaries should call Financial Institution Services at 1-800-638-8790 for more information on these requirements, as well as to be assigned an account number and instructions for opening an account. Other investors should call Investor Services at 1-800-638-5660 for more information about these requirements.

The funds are generally available only to investors residing in the United States. In addition, nongovernment money market funds that operate as “retail money market funds” pursuant to Rule 2a-7 under the Investment Company Act of 1940 are required to limit their beneficial owners to natural persons. An investor in a retail money market fund is required to demonstrate eligibility (for example, by providing a valid Social Security number) before an account can be opened.

PRICING OF SHARES AND TRANSACTIONS

How and When Shares Are Priced

The trade date for your transaction request depends on the day and time that T. Rowe Price receives your request and will normally be executed using the next share price calculated after your order is received in correct form by T. Rowe Price or its agent (or by your financial intermediary if it has the authority to accept transaction orders on behalf of the fund). The share price, also called the net asset value, for each share class of a fund is calculated as of the close of trading on the New York Stock Exchange (“NYSE”), which is normally 4 p.m. ET, on each day that the NYSE is open for business. Net asset values are not calculated for the funds on days when the NYSE is scheduled to be closed for trading (for example, weekends and certain U.S. national holidays). If the NYSE is unexpectedly closed due to weather or other extenuating circumstances on a day it would typically be open for business, or if the NYSE has an unscheduled early closing on a day it has opened for business, the funds reserve the right to treat such day as a business day and accept purchase and redemption orders and calculate their share price as of the normally scheduled close of regular trading on the NYSE for that day.

To calculate the net asset value, a fund’s assets are valued and totaled, liabilities are subtracted, and each class’ proportionate share of the balance, called net assets, is divided by the number of shares outstanding of that class. Market values are used to price portfolio holdings for which market quotations are readily available. Market values generally reflect the prices at which securities actually trade or represent prices that have been adjusted based on evaluations and information provided by the fund’s pricing services. Investments in other mutual funds are valued at the closing net asset value per share of the mutual fund on the day of valuation. If a market value for a portfolio holding is not available or normal valuation procedures are deemed to be inappropriate, the fund will make a good faith effort to assign a fair value to the

holding by taking into account various factors and methodologies that have been approved by the fund's Board. This value may differ from the value the fund receives upon sale of the securities.

Amortized cost is used to price securities held by money market funds and certain short-term debt securities held by other funds. The retail and government money market funds, which seek to maintain a stable net asset value of \$1.00, use the amortized cost method of valuation to calculate their net asset value. Amortized cost allows the money market funds to value a holding at the fund's acquisition cost with adjustments for any premiums or discounts and then round the net asset value per share to the nearest whole cent. The amortized cost method of valuation enables the money market funds to maintain a \$1.00 net asset value, but it may also result in periods during which the stated value of a security held by the funds differs from the market-based price the funds would receive if they sold that holding. The current market-based net asset value per share for each business day in the preceding six months is available for the retail and government money market funds through **troweprice.com**. These market-based net asset values are for informational purposes only and are not used to price transactions.

The funds use various pricing services to provide closing market prices, as well as information used to adjust those prices and to value most fixed income securities. A fund cannot predict how often it will use closing prices or how often it will adjust those prices. As a means of evaluating its fair value process, the fund routinely compares closing market prices, the next day's opening prices in the same markets, and adjusted prices.

Non-U.S. equity securities are valued on the basis of their most recent closing market prices at 4 p.m. ET, except under the following circumstances. Most foreign markets close before 4 p.m. ET. For example, the most recent closing prices for securities traded in certain Asian markets may be as much as 15 hours old at 4 p.m. ET. If a fund determines that developments between the close of a foreign market and the close of the NYSE will affect the value of some or all of the fund's securities, the fund will adjust the previous closing prices to reflect what it believes to be the fair value of the securities as of 4 p.m. ET. In deciding whether to make these adjustments, the fund reviews a variety of factors, including developments in foreign markets, the performance of U.S. securities markets, and the performance of instruments trading in U.S. markets that represent foreign securities and baskets of foreign securities.

A fund may also fair value certain securities or a group of securities in other situations—for example, when a particular foreign market is closed but the fund is open. For a fund that has investments in securities that are primarily listed on foreign exchanges that trade on weekends or other days when the fund does not price its shares, the fund's net asset value may change on days when shareholders will not be able to purchase or redeem the fund's shares. If an event occurs that affects the value of a security after the close of the market, such as a default of a commercial paper issuer or a significant move in short-term interest rates, a fund may make a price adjustment depending on the nature and significance of the event. The funds also evaluate a variety of factors when assigning fair values to private placements and other restricted securities. Other mutual funds may adjust the prices of their securities by different

amounts or assign different fair values than the fair value that the fund assigns to the same security.

The various ways you can purchase, sell, and exchange shares are explained throughout this section. These procedures differ based on whether you hold your account directly with T. Rowe Price or through an employer-sponsored retirement plan or financial intermediary.

INVESTING DIRECTLY WITH T. ROWE PRICE

The following policies apply to accounts that are held directly with T. Rowe Price and not through a financial intermediary.

Options for Opening Your Account

If you own other T. Rowe Price Funds, you should consider registering any new account identically to your existing accounts so you can exchange shares among them easily (the name(s) of the account owner(s) and the account type must be identical).

For joint accounts or other types of accounts owned or controlled by more than one party, either owner/party has complete authority to act on behalf of all and give instructions concerning the account without notice to the other party. T. Rowe Price may, in its sole discretion, require written authorization from all owners/parties to act on the account for certain transactions (for example, to transfer ownership). There are multiple ways to establish a new account directly with T. Rowe Price.

Online You can open a new Investor Class account online. (I Class accounts currently must be opened either by telephone or in writing.) Go to troweprice.com/newaccount to choose the type of account you wish to open.

You can exchange shares online from an existing account in one fund to open a new account in another fund. The new account will have the same registration as the account from which you are exchanging, and any services (other than systematic purchase and systematic distribution arrangements) that you have preauthorized will carry over from the existing account to the new account.

To open an account online for the first time or with a different account registration, you must be a U.S. citizen residing in the U.S. or a resident alien and not subject to Internal Revenue Service backup withholding. Additionally, you must provide consent to receive certain documents electronically. You will have the option of providing your bank account information, which will enable you to make electronic funds transfers to and from your bank account. To set up this banking service online, additional steps will be taken to verify your identity.

By Mail If you are sending a check, please make your check payable to T. Rowe Price Funds (otherwise it may be returned) and send the check, together with the applicable new account form, to the appropriate address. (Please refer to the appropriate address under “Contacting

T. Rowe Price” later in this section to avoid a delay in opening your new account.) T. Rowe Price does not accept third-party checks for initial purchases; however, third-party checks are typically accepted for additional purchases to an existing account. In addition, T. Rowe Price does not accept purchases by cash, traveler’s checks, money orders, or credit card checks. For exchanges from an identically registered account, be sure to specify the fund(s) and account number(s) that you are exchanging out of and the fund(s) you wish to exchange into.

By Telephone Direct investors can call Shareholder Services at 1-800-225-5132 (institutional investors should call 1-800-638-8790) to exchange from an existing fund account to open a new identically registered account in another fund. You may also be eligible to open a new account by telephone and provide your bank account information in order to make an initial purchase. To set up the account and banking service by telephone, additional steps will be taken to verify your identity and the authenticity of your bank account. Although the account may be opened and the purchase made, services may not be established and an Internal Revenue Service penalty withholding may occur until we receive the necessary signed form to certify your Social Security number or taxpayer identification number.

How Your Trade Date Is Determined

If you invest directly with T. Rowe Price and your request to purchase, sell, or exchange shares is received by T. Rowe Price or its agent in correct form by the close of the NYSE (normally 4 p.m. ET), your transaction will be priced at that business day’s net asset value. If your request is received by T. Rowe Price or its agent in correct form after the close of the NYSE, your transaction will be priced at the next business day’s net asset value.

Note: There may be times when you are unable to contact us by telephone or access your account online due to extreme market activity, the unavailability of the T. Rowe Price website, or other circumstances. Should this occur, your order must still be placed and received in correct form by T. Rowe Price prior to the time the NYSE closes to be priced at that business day’s net asset value. The time at which transactions and shares are priced and the time until which orders are accepted may be changed in case of an emergency or if the NYSE closes at a time other than 4 p.m. ET. The funds reserve the right to not treat an unscheduled intraday disruption or closure in NYSE trading as a closure of the NYSE and still accept transactions and calculate their net asset value as of 4 p.m. ET.

Transaction Confirmations

T. Rowe Price sends immediate confirmations for most of your fund transactions. However, certain transactions, such as systematic purchases and systematic redemptions, dividend reinvestments, checkwriting redemptions from money market funds, and transactions in money market funds used as a Brokerage sweep account, do not receive an immediate transaction confirmation but are reported on your account statement. Please review transaction confirmations and account statements as soon as you receive them, and promptly report any discrepancies to Shareholder Services.

Telephone and Online Account Transactions

You may access your accounts and conduct transactions involving Investor Class accounts using the telephone or the T. Rowe Price website at **troweprice.com**. You can only conduct transactions involving the I Class over the telephone or in writing.

Preventing Unauthorized Transactions

The T. Rowe Price Funds and their agents use reasonably designed procedures to verify that telephone, electronic, and other instructions are genuine. These procedures include, among other things, recording telephone calls; requiring personalized security codes or other information online and certain identifying information for telephone calls; requiring Medallion signature guarantees for certain transactions and account changes; and promptly sending confirmations of transactions and address changes. For transactions conducted online, we recommend the use of a secure Internet browser.

T. Rowe Price Account Protection Program Shareholders who invest in the T. Rowe Price Funds directly are eligible for the Account Protection Program. The Account Protection Program restores eligible losses due to unauthorized or fraudulent activity, provided that you follow all security best practices when you access and maintain your account(s). T. Rowe Price reserves the right to modify or withdraw the Account Protection Program at any time. The Account Protection Program security best practices and additional information may be accessed online at <https://www.troweprice.com/personal-investing/help/policies-and-security/account-protection-program.html>.

If our verification procedures are followed, and the losses are not eligible to be restored under the Account Protection Program, the funds and their agents are not liable for any losses that may occur from acting on unauthorized instructions.

If you suspect any unauthorized account activity, notice errors or discrepancies in your T. Rowe Price account, or are not receiving your T. Rowe Price account statements, please contact T. Rowe Price immediately. Telephone conversations are recorded.

Trusted Contacts Investors who hold shares of a T. Rowe Price Fund directly or through a T. Rowe Price Brokerage account have the option to add one or more trusted contacts to their brokerage and mutual fund accounts. Trusted contacts are intended to be a resource to help protect client assets. Any individuals designated as a trusted contact will be authorized to serve as a primary contact if T. Rowe Price has questions or concerns related to potentially fraudulent account activity, suspected financial exploitation, or to confirm your contact information if we are unable to reach you (but are not authorized to act on your account). For more information or to add trusted contacts to your account, visit **troweprice.com** or call 1-800-225-5132.

If you are age 65 or older, or if we have reason to believe you have a mental or physical impairment that renders you unable to protect your own interest, we may temporarily delay the disbursement of redemption proceeds from your account in an effort to protect you if we reasonably believe that you have been the victim of actual or attempted financial exploitation. You will receive notice of this temporary delay, and it will be for no more than 15 business days

while we conduct an internal review of the suspected financial exploitation (including contacting your trusted contact if one is on file). We may delay an additional 10 business days if T. Rowe Price reasonably believes that actual or attempted financial exploitation has occurred or will occur. At the expiration of the hold time, if we have not confirmed that exploitation has occurred, the proceeds will be released to you.

Purchasing Shares

Shares may be purchased in a variety of ways.

By Check Please make your check payable to the T. Rowe Price Funds. Include a new account form if establishing a new account, and include either a fund investment slip or a letter indicating the fund and your account number if adding to an existing account. Your transaction will receive the share price for the business day that the request is received by T. Rowe Price or its agent prior to the close of the NYSE (not the day the request is received at the post office box).

By Electronic Transfer Shares may be purchased using the Automated Clearing House system if you have established the service on your account, which allows T. Rowe Price to request payment for your shares directly from your bank account or other financial institution account. You may also arrange for a wire to be sent to T. Rowe Price (wire transfer instructions can be found at [troweprice.com/wireinstructions](https://www.troweprice.com/wireinstructions) or by calling Shareholder Services). T. Rowe Price must receive the wire by the close of the NYSE to receive that day's share price. There is no assurance that you will receive the share price for the same day you initiated the wire from your financial institution.

By Exchange You may purchase shares of a fund using the proceeds from the redemption of shares from another fund. The redemption and purchase will receive the same trade date, and if you are establishing a new account, it will have the same registration as the account from which you are exchanging. The purchase must still generally meet the applicable minimum investment requirement.

Systematic Purchases (Automatic Asset Builder) You can instruct T. Rowe Price to automatically transfer money from your account at your bank or other financial institution at least once per month, or you can instruct your employer to send all or a portion of your paycheck to the fund or funds that you designate. Each systematic purchase must be at least \$100 per fund account to be eligible for the Automatic Asset Builder service. To automatically transfer money to your account from a bank account or through payroll deductions, complete the appropriate section of the new account form when opening a new account or complete an Account Services Form to add the service to an existing account. Prior to establishing payroll deductions, you must set up the service with T. Rowe Price so that the appropriate instructions can be provided to your employer.

Initial Investment Minimums

Investor Class accounts, other than the Retirement Income 2020 Fund and Summit Funds, require a \$2,500 minimum initial investment (\$1,000 minimum initial investment for IRAs; certain small business retirement accounts; and custodial accounts for minors, known as

Uniform Gifts to Minors Act or Uniform Transfer to Minors Act accounts). The Retirement Income 2020 Fund and Summit Funds require a \$25,000 minimum initial investment. I Class accounts require a \$1 million minimum initial investment, although the minimum generally is waived for certain types of accounts. If you request the I Class of a particular fund when you open a new account but the investment amount does not meet the applicable minimum, the purchase will be automatically invested in the Investor Class of the same fund.

Additional Investment Minimums

Investor Class accounts, other than Summit Funds, require a \$100 minimum for additional purchases, including those made through Automatic Asset Builder. Summit Funds require a \$100 minimum for additional purchases through Automatic Asset Builder and a \$1,000 minimum for all other additional purchases. I Class accounts require a \$100 minimum for additional purchases through Automatic Asset Builder but do not require a minimum amount for other additional purchases.

Exchanging and Redeeming Shares

Certain T. Rowe Price Funds assess a fee on redemptions of shares (including exchanges out of a fund) that are not held for a specified period of time. Please refer to “Contingent Redemption Fee” later in this section.

Exchanges You can move money from one account to an existing, identically registered account or open a new identically registered account. For taxable accounts, an exchange from one fund to another will be reported to the Internal Revenue Service as a sale for tax purposes. (Institutional investors are restricted from exchanging into a fund that operates as a retail money market fund.) You can set up systematic exchanges so that money is automatically moved from one fund account to another on a regular basis.

Receiving Redemption Proceeds Redemption proceeds can be mailed to your account address by check or sent electronically to your bank account by Automated Clearing House transfer or bank wire. You can set up systematic redemptions and have the proceeds automatically sent via check or Automated Clearing House on a regular basis. If your request is received in correct form by T. Rowe Price or its agent on a business day prior to the close of the NYSE, proceeds are usually sent on the next business day. However, if you request a redemption from a money market fund on a business day prior to noon ET and request to have proceeds sent via bank wire, proceeds are normally sent later that same day.

Proceeds sent by Automated Clearing House transfer are usually credited to your account the second business day after the sale, and there are typically no fees associated with such payments. Proceeds sent by bank wire are usually credited to your account the next business day after the sale (except for wire redemptions from money market funds received prior to noon ET). A \$5 fee will be charged for an outgoing wire of less than \$5,000, in addition to any fees your financial institution may charge for an incoming wire.

If for some reason your request to exchange or redeem shares cannot be processed because it is not received in correct form, we will attempt to contact you.

If you request to redeem a specific dollar amount and the market value of your account is less than the amount of your request and we are unable to contact you, your redemption will not be processed and you must submit a new redemption request in correct form.

If you change your address on an account, proceeds may not be mailed to the new address for 15 calendar days after the address change, unless we receive a letter of instruction with a Medallion signature guarantee.

Please note that large purchase and redemption requests initiated through the Automated Clearing House may be rejected, and in such instances, the transaction must be placed by calling Shareholder Services.

Checkwriting You may write an unlimited number of free checks on any money market fund and certain bond funds, with a minimum of \$500 per check. Keep in mind, however, that a check results in a sale of fund shares; a check written on a bond fund will create a taxable event that must be reported by T. Rowe Price to the Internal Revenue Service as a redemption.

Converting to Another Share Class

You may convert from one share class of a fund to another share class of the same fund. Although the conversion has no effect on the dollar value of your investment in the fund, the number of shares owned after the conversion may be greater or less than the number of shares owned before the conversion, depending on the net asset values of the two share classes. A conversion between share classes of the same fund is a nontaxable event. The new account will have the same registration as the account from which you are converting.

T. Rowe Price may conduct periodic reviews of account balances. If your account balance in a fund exceeds the minimum amount required for the I Class, T. Rowe Price may, but is not required to, automatically convert your Investor Class shares to I Class shares with advance notice. However, if T. Rowe Price has investment discretion, T. Rowe Price may convert your shares without advance notice.

Maintaining Your Account Balance

Investor Class Due to the relatively high cost to a fund of maintaining small accounts, we ask that you maintain an account balance of at least \$1,000 (\$10,000 for Summit Funds). If, for any reason, your balance is below this amount for three months or longer, we have the right to redeem your account at the then-current net asset value after giving you 60 days to increase your balance.

I Class To keep operating expenses lower, we ask that you maintain an account balance of at least \$1 million. If your investment falls below \$1 million (even if due to market depreciation), we have the right to redeem your account at the then-current net asset value after giving you 60 days to increase your balance or convert your account to a different share class in the same fund (if available) with a higher expense ratio with advance notice. However, if T. Rowe Price has investment discretion, T. Rowe Price may convert your shares without advance notice.

The redemption of your account could result in a taxable gain or loss.

Investors holding the fund through the T. Rowe Price ActivePlus Portfolios program will be subject to the minimum account balance requirements of the program, which may differ from the minimum account balance requirements listed above.

INVESTING THROUGH A FINANCIAL INTERMEDIARY

The following policies apply to accounts that are held through a financial intermediary.

Accounts in Investor Class and I Class shares are not required to be held through a financial intermediary, but accounts in Advisor Class and R Class shares must be held through an eligible financial intermediary (except for certain retirement plans held directly with T. Rowe Price). It is important that you contact your retirement plan or financial intermediary to determine the policies, procedures, and transaction deadlines that apply to your account. The financial intermediary may charge a fee, such as transaction fees or brokerage commissions, for its services.

Opening an Account

The financial intermediary must provide T. Rowe Price with its certified taxpayer identification number. Financial intermediaries should call Financial Institution Services for an account number and wire transfer instructions. In order to obtain an account number, the financial intermediary must supply the name, taxpayer identification number, and business street address for the account. (Please refer to “Contacting T. Rowe Price” later in this section for the appropriate telephone number and mailing address.) Financial intermediaries must also enter into a separate agreement with the fund or its agent.

How the Trade Date Is Determined

If you invest through a financial intermediary and your transaction request is received by T. Rowe Price or its agent in correct form by the close of the NYSE, your transaction will be priced at that business day’s net asset value. If your request is received by T. Rowe Price or its agent in correct form after the close of the NYSE, your transaction will be priced at the next business day’s net asset value unless the fund has an agreement with your financial intermediary for orders to be priced at the net asset value next computed after receipt by the financial intermediary.

The funds have authorized certain financial intermediaries or their designees to accept orders to buy or sell fund shares on their behalf. When authorized financial intermediaries receive an order in correct form, the order is considered as being placed with the fund and shares will be bought or sold at the net asset value next calculated after the order is received by the authorized financial intermediary. The financial intermediary must transmit the order to T. Rowe Price and pay for such shares in accordance with the agreement with T. Rowe Price or the order may be canceled and the financial intermediary could be held liable for the losses. If the fund does not have such an agreement in place with your financial intermediary, T. Rowe Price or its

agent must receive the request in correct form from your financial intermediary by the close of the NYSE in order for your transaction to be priced at that business day's net asset value.

Note: The time at which transactions and shares are priced and the time until which orders are accepted by the fund or a financial intermediary may be changed in case of an emergency or if the NYSE closes at a time other than 4 p.m. ET. The funds reserve the right to not treat an unscheduled intraday disruption or closure in NYSE trading as a closure of the NYSE and still accept transactions and calculate their net asset value as of 4 p.m. ET. Should this occur, your order must still be placed and received in correct form by T. Rowe Price (or by the financial intermediary in accordance with its agreement with T. Rowe Price) prior to the time the NYSE closes to be priced at that business day's net asset value.

Purchasing Shares

All initial and subsequent investments by financial intermediaries should be made by bank wire or electronic payment. There is no assurance that the share price for the purchase will be the same day the wire was initiated. Purchases by financial intermediaries are typically initiated through the National Securities Clearing Corporation or by calling Financial Institution Services.

Investment Minimums

You should check with your financial intermediary to determine what minimum applies to your initial and additional investments.

The Retirement Income 2020 Fund and Summit Funds require a \$25,000 minimum initial investment, and other funds generally require a \$2,500 minimum initial investment, although the minimum is generally waived or modified for any retirement plans and financial intermediaries establishing accounts in the Investor Class, Advisor Class, or R Class. I Class accounts require a \$1 million minimum initial investment, although the minimum generally is waived for certain types of accounts.

Investments through a financial intermediary generally do not require a minimum amount for additional purchases.

Redeeming Shares

Certain T. Rowe Price Funds assess a fee on redemptions of shares (including exchanges out of a fund) that are not held for a specified period of time. Please refer to "Contingent Redemption Fee" later in this section.

Unless otherwise indicated, redemption proceeds will be sent via bank wire to the financial intermediary's designated bank. Redemptions by financial intermediaries are typically initiated through the National Securities Clearing Corporation or by calling Financial Institution Services. Normally, the fund transmits proceeds to financial intermediaries for redemption orders received in correct form on either the next business day or second business day after receipt of the order, depending on the arrangement with the financial intermediary. Proceeds for redemption orders received prior to noon ET for a money market fund may be sent via wire

the same business day. You must contact your financial intermediary about procedures for receiving your redemption proceeds.

Please note that certain purchase and redemption requests initiated through the National Securities Clearing Corporation may be rejected, and in such instances, the transaction must be placed by contacting Financial Institution Services.

GENERAL POLICIES RELATING TO TRANSACTIONS

The following policies and requirements apply generally to accounts in the T. Rowe Price Funds, regardless of whether the account is held directly or indirectly with T. Rowe Price.

The funds generally do not accept orders that request a particular day or price for a transaction or any other special conditions. However, when authorized by the fund, certain institutions, financial intermediaries, or retirement plans purchasing fund shares directly with T. Rowe Price may place a purchase order unaccompanied by payment. Payment for these shares must be received by the time designated by the fund (not to exceed the period established for settlement under applicable regulations). If payment is not received by this time, the order may be canceled. The institution, financial intermediary, or retirement plan is responsible for any costs or losses incurred by the fund or T. Rowe Price if payment is delayed or not received.

U.S. Dollars All purchases must be paid for in U.S. dollars; checks must be drawn on U.S. banks. In addition, we request that you give us at least three business days' notice for any purchase of \$5 million or more.

Nonpayment If a check or Automated Clearing House transfer does not clear or payment for an order is not received in a timely manner, your purchase may be canceled. You (or the financial intermediary) may be responsible for any losses or expenses incurred by the fund or its transfer agent, and the fund can redeem shares in your account or another identically registered T. Rowe Price account as reimbursement. The funds and their agents have the right to reject or cancel any purchase, exchange, or redemption due to nonpayment.

Retail Money Market Funds The retail money market funds have implemented policies and procedures designed to limit purchases to accounts beneficially owned by a natural person. Purchases of a retail money market fund may be rejected from an investor who has not demonstrated sufficient eligibility to purchase shares of the fund or from a financial intermediary that has not demonstrated adequate procedures to limit investments to natural persons. In addition, purchases may be prohibited or subject to certain conditions during periods where a liquidity fee or redemption gate is in effect.

Liquidity Fees and Redemption Gates—Retail Money Market Funds

A money market fund that operates as a retail money market fund pursuant to Rule 2a-7 under the Investment Company Act of 1940 has the ability to impose liquidity fees of up to 2% of the value of the shares redeemed if the fund's weekly liquid assets fall below certain thresholds, as

specified in Rule 2a-7. A retail money market fund also has the ability to impose a redemption gate, which enables the fund to temporarily suspend redemptions for up to 10 days within a 90-day period if the fund's weekly liquid assets fall below a certain threshold, as specified in Rule 2a-7. A money market fund's Board has ultimate discretion to determine whether or not a liquidity fee or redemption gate would be in the best interests of the fund's shareholders and should be imposed.

A money market fund that operates as a government money market fund pursuant to Rule 2a-7 is not required to impose a liquidity fee or redemption gate upon the sale of your shares. The Boards of the T. Rowe Price money market funds that operate as government money market funds have determined that the funds do not intend to impose liquidity fees and redemption gates. However, the Board of a T. Rowe Price government money market fund reserves the right to impose liquidity fees and redemption gates in the future, at which point shareholders would be provided with at least 60 days' notice prior to such a change.

If a liquidity fee is in place, all exchanges out of the fund will be subject to the liquidity fee, and if a redemption gate is in place, all exchanges out of the fund will be suspended. When a liquidity fee or redemption gate is in place, the fund may elect to not permit the purchase of shares or to subject the purchase of shares to certain conditions, which may include affirmation of the purchaser's knowledge that a liquidity fee or a redemption gate is in effect.

Omnibus Accounts If your shares are held through a financial intermediary, T. Rowe Price may rely on the financial intermediary to assess any applicable liquidity fees or impose redemption gates on underlying shareholder accounts. In certain situations, T. Rowe Price enters into agreements with financial intermediaries maintaining omnibus accounts that require the financial intermediary to assess liquidity fees or redemption gates. There are no assurances that T. Rowe Price will be successful in ensuring that all financial intermediaries will properly assess the fees.

Please refer to Sections 1 and 2 of retail money market fund prospectuses for more information regarding liquidity fees and redemption gates.

Large Redemptions

Large redemptions (for example, \$250,000 or more) can adversely affect a portfolio manager's ability to implement a fund's investment strategy by causing the premature sale of securities that would otherwise be held longer. Therefore, the fund reserves the right (without prior notice) to redeem in kind. In general, any redemptions in-kind will represent a pro-rata distribution of a fund's securities, subject to certain limited exceptions. The redeeming shareholder will be responsible for disposing of the securities, and the shareholder will be subject to the risks that the value of the securities could decline prior to their sale, the securities could be difficult to sell, and brokerage fees could be incurred. If you continue to hold the securities, you may be subject to any ownership restriction imposed by the issuers. For example, real estate investment trusts ("REITs") often impose ownership restriction on their equity securities. In addition, we request that you give us at least three business days' notice for any redemption of \$5 million or more.

Delays in Sending Redemption Proceeds

The T. Rowe Price Funds typically expect that redemption requests will be paid out to redeeming shareholders by the business day following the receipt of a redemption request that is in correct form, regardless of the method the fund uses to make such payment (for example, check, wire, or Automated Clearing House transfer). Checks are typically mailed on the business day after the redemption, proceeds sent by wire are typically credited to your financial institution the business day after the redemption, and proceeds sent by Automated Clearing House are typically credited to your financial institution on the second business day after the redemption. However, under certain circumstances, and when deemed to be in a fund's best interests, proceeds may not be sent for up to seven calendar days after receipt of a valid redemption order (for example, during periods of deteriorating or stressed market conditions or during extraordinary or emergency circumstances).

In addition, if shares are sold that were just purchased and paid for by check or Automated Clearing House transfer, the fund will process your redemption but will generally delay sending the proceeds for up to seven calendar days to allow the check or Automated Clearing House transfer to clear. If, during the clearing period, we receive a check drawn against your newly purchased shares, it will be returned and marked "uncollected." (The seven-day hold does not apply to purchases paid for by bank wire or automatic purchases through payroll deduction.)

The Board of a retail money market fund may temporarily suspend redemptions from the fund for up to 10 business days during any 90-day period (i.e., a "redemption gate") and elect to temporarily suspend redemptions for up to 10 business days in a 90-day period if the fund's weekly liquid assets fall below 30% of its total assets and the fund's Board determines that imposing a redemption gate is in the fund's best interests. In addition, under certain limited circumstances, the Board of a money market fund may elect to permanently suspend redemptions in order to facilitate an orderly liquidation of the fund (subject to any additional liquidation requirements).

Involuntary Redemptions and Share Class Conversions

Since nongovernment money market funds that operate as retail money market funds are required to limit their beneficial owners to natural persons, shares held directly by an investor or through a financial intermediary in these funds that are not eligible to invest in a retail money market fund are subject to involuntary redemption at any time without prior notice.

Shares held by any investors or financial intermediaries that are no longer eligible to invest in the I Class or who fail to meet or maintain their account(s) at the investment minimum are subject to involuntary redemption or conversion to the Investor Class of the same fund (which may have a higher expense ratio). Investments in Advisor Class shares that are no longer held through an eligible financial intermediary may be automatically converted by T. Rowe Price to the Investor Class of the same fund following notice to the financial intermediary or shareholder. Investments in R Class shares that are no longer held on behalf of an employer-sponsored defined contribution retirement plan or other eligible R Class account or that are not held through an eligible financial intermediary may be automatically converted by T. Rowe

Price to the Investor Class or Advisor Class of the same fund following notice to the financial intermediary or shareholder.

Excessive and Short-Term Trading Policy

Excessive transactions and short-term trading can be harmful to fund shareholders in various ways, such as disrupting a fund's portfolio management strategies, increasing a fund's trading and other costs, and negatively affecting its performance. Short-term traders in funds that invest in foreign securities may seek to take advantage of developments overseas that could lead to an anticipated difference between the price of the funds' shares and price movements in foreign markets. While there is no assurance that T. Rowe Price can prevent all excessive and short-term trading, the Boards of the T. Rowe Price Funds have adopted the following trading limits that are designed to deter such activity and protect the funds' shareholders. The funds may revise their trading limits and procedures at any time as the Boards deem necessary or appropriate to better detect short-term trading that may adversely affect the funds, to comply with applicable regulatory requirements, or to impose additional or alternative restrictions.

Subject to certain exceptions, each T. Rowe Price Fund restricts a shareholder's purchases (including through exchanges) into a fund account for a period of 30 calendar days after the shareholder has redeemed or exchanged out of that same fund account (the "30-Day Purchase Block"). The calendar day after the date of redemption is considered Day 1 for purposes of computing the period before another purchase may be made.

General Exceptions As of the date of this prospectus, the following types of transactions generally are not subject to the funds' excessive and short-term trading policy:

- Shares purchased or redeemed in money market funds and ultra-short-term bond funds;
- Shares purchased or redeemed through a systematic purchase or withdrawal plan;
- Checkwriting redemptions from bond funds and money market funds;
- Shares purchased through the reinvestment of dividends or capital gain distributions;
- Shares redeemed automatically by a fund to pay fund fees or shareholder account fees;
- Transfers and changes of account registration within the same fund;
- Shares purchased by asset transfer or direct rollover;
- Shares purchased or redeemed through IRA conversions and recharacterizations;
- Shares redeemed to return an excess contribution from a retirement account;
- Transactions in Section 529 college savings plans;
- Certain transactions in defined benefit and nonqualified plans, subject to prior approval by T. Rowe Price;
- Shares converted from one share class to another share class in the same fund;
- Shares of T. Rowe Price Funds that are purchased by another T. Rowe Price Fund, including shares purchased by T. Rowe Price fund-of-funds products, and shares purchased by discretionary accounts managed by T. Rowe Price or one of its affiliates (please note that shareholders of the investing T. Rowe Price Fund are still subject to the policy);
- Transactions initiated by the trustee or adviser to a donor-advised charitable gift fund as approved by T. Rowe Price; and

- Effective April 1, 2019, transactions having a value of \$5,000 or less (retirement plans, including those for which T. Rowe Price serves as recordkeeper, and other financial intermediaries may apply the excessive and short-term trading policy to transactions of any amount).

Transactions in certain rebalancing, asset allocation, wrap programs, and other advisory programs (including the T. Rowe Price ActivePlus Portfolios program), as well as non-T. Rowe Price fund-of-funds products, may also be exempt from the 30-Day Purchase Block, subject to prior written approval by T. Rowe Price.

In addition to restricting transactions in accordance with the 30-Day Purchase Block, T. Rowe Price may, in its discretion, reject (or instruct a financial intermediary to reject) any purchase or exchange into a fund from a person (which includes individuals and entities) whose trading activity could disrupt the management of the fund or dilute the value of the fund's shares, including trading by persons acting collectively (for example, following the advice of a newsletter). Such persons may be barred, without prior notice, from further purchases of T. Rowe Price Funds for a period longer than 30 calendar days, or permanently.

Financial Intermediary and Retirement Plan Accounts If you invest in T. Rowe Price Funds through a financial intermediary, including a retirement plan, you should review the financial intermediary's or retirement plan's materials carefully or consult with the financial intermediary or plan sponsor directly to determine the trading policy that will apply to your trades in the T. Rowe Price Funds as well as any other rules or conditions on transactions that may apply. If T. Rowe Price is unable to identify a transaction placed through a financial intermediary as exempt from the excessive trading policy, the 30-Day Purchase Block may apply.

Financial intermediaries, including retirement plans, may maintain their underlying accounts directly with the fund, although they often establish an omnibus account (one account with the fund that represents multiple underlying shareholder accounts) on behalf of their customers. When financial intermediaries establish omnibus accounts in the T. Rowe Price Funds, T. Rowe Price is not able to monitor the trading activity of the underlying shareholders. However, T. Rowe Price monitors aggregate trading activity at the financial intermediary (omnibus account) level in an attempt to identify activity that indicates potential excessive or short-term trading. If it detects such trading activity, T. Rowe Price may contact the financial intermediary to request personal identifying information and transaction histories for some or all underlying shareholders (including plan participants, if applicable) pursuant to a written agreement that T. Rowe Price has entered into with each financial intermediary. Any nonpublic personal information provided to the fund (for example, a shareholder's taxpayer identification number or transaction records) is subject to the fund's privacy policy. If T. Rowe Price believes that excessive or short-term trading has occurred and there is no exception for such trades under the funds' Excessive and Short-Term Trading Policy previously described, it will instruct the financial intermediary to impose restrictions to discourage such practices and take appropriate action with respect to the underlying shareholder, including restricting purchases for 30 calendar days or longer. Each financial intermediary has agreed to execute

such instructions pursuant to a written agreement. There is no assurance that T. Rowe Price will be able to properly enforce its excessive trading policies for omnibus accounts. Because T. Rowe Price generally relies on financial intermediaries to provide information and impose restrictions for omnibus accounts, its ability to monitor and deter excessive trading will be dependent upon the intermediaries' timely performance of their responsibilities.

For shares that are held in a retirement plan, generally the 30-Day Purchase Block applies only to shares redeemed by a participant-directed exchange to another fund. However, the 30-Day Purchase Block may apply to transactions other than exchanges depending on how shares of the plan are held at T. Rowe Price or the excessive trading policy applied by your plan's recordkeeper.

T. Rowe Price may allow a financial intermediary, including a retirement plan, to maintain restrictions on trading in the T. Rowe Price Funds that differ from the 30-Day Purchase Block. An alternative excessive trading policy would be acceptable to T. Rowe Price if it believes that the policy would provide sufficient protection to the T. Rowe Price Funds and their shareholders that is consistent with the excessive trading policy adopted by the funds' Boards.

There is no guarantee that T. Rowe Price will be able to identify or prevent all excessive or short-term trades or trading practices.

Contingent Redemption Fee

In addition to the Excessive and Short-Term Trading Policy, through March 31, 2019, all share classes of the T. Rowe Price Funds listed in the following table assess a fee on redemptions (including exchanges out of a fund), which reduces the proceeds from such redemptions by the amounts indicated below. Effective April 1, 2019, the Boards of the T. Rowe Price Funds listed in the following table have approved removing the redemption fee from each fund. Any redemption from a T. Rowe Price Fund (or exchange out of a Fund) with a trade date of April 1, 2019, or later will not be assessed a redemption fee, regardless of how long the shares were held.

T. Rowe Price Funds With Redemption Fees*

* Effective April 1, 2019, the T. Rowe Price Funds will no longer assess a redemption fee.

Redemption fees are paid to the fund (and not to T. Rowe Price) to deter short-term trading, offset costs, and help protect the fund's long-term shareholders. Subject to the exceptions

described on the following pages, through March 31, 2019, all persons holding shares of a T. Rowe Price Fund that imposes a redemption fee are subject to the fee, whether the person is holding shares directly with a T. Rowe Price Fund; through a retirement plan for which T. Rowe Price serves as recordkeeper; or indirectly through a financial intermediary (such as a broker, bank, or investment advisor), recordkeeper for retirement plan participants, or other third party.

Computation of Holding Period When an investor sells shares of a fund that assesses a redemption fee, T. Rowe Price will use the “first-in, first-out” method to determine the holding period for the shares sold. Under this method, the date of redemption or exchange will be compared with the earliest purchase date of shares held in the account. The day after the date of your purchase is considered Day 1 for purposes of computing the holding period. For a fund with a 365-day holding period, a redemption fee will be charged on shares sold **before** the end of the required holding period. For funds with a 90-day holding period, a redemption fee will be charged on shares sold **on or before** the end of the required holding period. For example, if you redeem your shares on or before the 90th day from the date of purchase, you will be assessed the redemption fee. If you purchase shares through a financial intermediary, consult your financial intermediary to determine how the holding period will be applied.

Transactions Not Subject to Redemption Fees During the period in which certain T. Rowe Price Funds charge a redemption fee, the T. Rowe Price Funds will not assess a redemption fee with respect to certain transactions. As of the date of this prospectus, the following transactions in T. Rowe Price Funds will not be subject to redemption fees (through March 31, 2019):

- Shares redeemed through an automated, systematic withdrawal plan;
- Shares redeemed through or used to establish certain rebalancing, asset allocation, wrap, and advisory programs (including the T. Rowe Price ActivePlus Portfolios program), as well as non-T. Rowe Price fund-of-funds products, if approved in writing by T. Rowe Price;
- Shares purchased through the reinvestment of dividends or capital gain distributions;*
- Shares converted from one share class to another share class of the same fund;*
- Shares redeemed automatically by a fund to pay fund fees or shareholder account fees (for example, for failure to meet account minimums);
- Shares purchased by rollover or changes of account registration within the same fund;*
- Shares redeemed to return an excess contribution from a retirement account;
- Shares of T. Rowe Price Funds purchased by another T. Rowe Price Fund and shares purchased by discretionary accounts managed by T. Rowe Price or one of its affiliates (please note that other shareholders of the investing T. Rowe Price Fund are still subject to the policy);
- Transactions initiated by the trustee or advisor to a donor-advised charitable gift fund as approved by T. Rowe Price;
- Certain transactions in defined benefit and nonqualified plans, subject to prior approval by T. Rowe Price;
- Shares that are redeemed in-kind;

- Shares transferred to T. Rowe Price or a financial intermediary acting as a service provider when the age of the shares cannot be determined systematically;* and
- Shares redeemed in retirement plans or other products that restrict trading to no more frequently than once per quarter or other approved time period, if approved in writing by T. Rowe Price.

* Subsequent exchanges of these shares into funds that assess redemption fees will subject such shares to the fee.

Redemption Fees on Shares Held in Retirement Plans During the period in which certain T. Rowe Price Funds charge a redemption fee, if shares are held in a retirement plan, redemption fees generally will be assessed on shares redeemed by exchange only if they were originally purchased by a participant-directed exchange. However, redemption fees may apply to transactions other than exchanges depending on how shares of the plan are held at T. Rowe Price or how the fees are applied by your plan's recordkeeper. To determine which of your transactions are subject to redemption fees, you should contact T. Rowe Price or your plan recordkeeper.

Omnibus Accounts During the period in which certain T. Rowe Price Funds charge a redemption fee, if your shares are held through a financial intermediary in an omnibus account, T. Rowe Price relies on the financial intermediary to assess the redemption fee on underlying shareholder accounts. T. Rowe Price seeks to enter into agreements with financial intermediaries establishing omnibus accounts that require the intermediary to assess the redemption fees. There are no assurances that T. Rowe Price will be successful in identifying all financial intermediaries or that the intermediaries will properly assess the fees.

Certain financial intermediaries may not apply the exemptions previously listed to the redemption fee policy; all redemptions by persons trading through such intermediaries may be subject to the fee. Certain financial intermediaries may exempt transactions not listed from redemption fees, if approved by T. Rowe Price. Persons redeeming shares through a financial intermediary should check with their respective intermediary to determine which transactions are subject to the fees.

Unclaimed Accounts and Uncashed Checks

If your account has no activity for a certain period of time and/or mail sent to you from T. Rowe Price (or your financial intermediary) is returned by the post office, T. Rowe Price (or your financial intermediary) may be required to transfer your account and any assets related to uncashed checks to the appropriate state under its abandoned property laws. To avoid such action, it is important to keep your account address up to date and periodically communicate with T. Rowe Price by contacting us or logging in to your account at least once every two years.

Delivery of Shareholder Documents

If two or more accounts own the same fund, share the same address, and T. Rowe Price reasonably believes that the two accounts are part of the same household or institution, we may economize on fund expenses by mailing only one shareholder report and prospectus for the fund. If you need additional copies or do not want your mailings to be "householded," please call Shareholder Services.

T. Rowe Price can deliver account statements, transaction confirmations, prospectuses, tax forms, and shareholder reports electronically. If you are a registered user of **troweprice.com**, you can consent to the electronic delivery of these documents by logging in and changing your mailing preferences. You can revoke your consent at any time through **troweprice.com**, and we will begin to send paper copies of these documents within a reasonable time after receiving your revocation.

Signature Guarantees

A Medallion signature guarantee is designed to protect you and the T. Rowe Price Funds from fraud by verifying your signature.

A shareholder or financial intermediary may need to obtain a Medallion signature guarantee in certain situations, such as:

- Requests to wire redemption proceeds when bank account information is not already authorized and on file for an account;
- Remitting redemption proceeds to any person, address, or bank account not on file;
- Establishing certain services after an account is opened; or
- Changing the account registration or broker-dealer of record for an account.

Financial intermediaries should contact T. Rowe Price Financial Institution Services for specific requirements.

The signature guarantee must be obtained from a financial institution that is a participant in a Medallion signature guarantee program. You can obtain a Medallion signature guarantee from certain banks, savings institutions, broker-dealers, and other guarantors acceptable to T. Rowe Price. When obtaining a Medallion signature guarantee, please discuss with the guarantor the dollar amount of your proposed transaction. It is important that the level of coverage provided by the guarantor's stamp covers the dollar amount of the transaction or it may be rejected. We cannot accept guarantees from notaries public or organizations that do not provide reimbursement in the case of fraud.

Fund Operations and Shareholder Services

T. Rowe Price and The Bank of New York Mellon, subject to the oversight of T. Rowe Price, each provide certain accounting services to the T. Rowe Price Funds. T. Rowe Price Services, Inc., acts as the transfer agent and dividend disbursing agent and provides shareholder and administrative services to the funds. T. Rowe Price Retirement Plan Services, Inc., provides recordkeeping, sub-transfer agency, and administrative services for certain types of retirement plans investing in the funds. These companies receive compensation from the funds for their services. The funds may also pay financial intermediaries for performing shareholder and administrative services for underlying shareholders in omnibus accounts. In addition, certain funds serve as an underlying fund in which some fund-of-funds products, the T. Rowe Price Spectrum and Retirement Funds, invest. Subject to approval by each applicable fund's Board, each underlying fund bears its proportionate share of the direct operating expenses of the T. Rowe Price Spectrum and Retirement Funds. All of the fees previously discussed are

included in a fund's financial statements and, except for funds that have an all-inclusive management fee, are also reflected in the "Other expenses" line that appears in a fund's fee table in Section 1.

CONTACTING T. ROWE PRICE

Accounts Held Directly With T. Rowe Price

Investors who want to open an account directly with T. Rowe Price or who already have an account held directly with T. Rowe Price (and not through a financial intermediary) should refer to the following information.

Online You can open an account and place most transactions online at **troweprice.com**.

Telephone If you have questions relating to the opening of a new account (including Traditional, Roth, and Rollover IRAs and most nonretirement accounts) with T. Rowe Price, please call Investor Services at 1-800-638-5660. To place a transaction, report unauthorized activity on your account or a discrepancy on your transaction confirmation, elect out of the "householding" of prospectuses and shareholder reports, or ask a question about an existing account, please call Shareholder Services at 1-800-225-5132. If you find our phones busy during unusually volatile markets, please consider placing your order online.

To access information on fund performance, prices, account balances, and your latest transactions 24 hours a day, please call T. Rowe Price Tele*Access[®] at 1-800-638-2587. (Please note that transactions cannot be placed through Tele*Access[®].)

If you are an institutional investor opening an account directly with T. Rowe Price or have questions or want to place a transaction on an existing account, please call Financial Institution Services at 1-800-638-8790.

For inquiries regarding funds owned in a small business retirement plan, which include SEP-IRA, SAR-SEP, SIMPLE IRA, individual 401(k), profit sharing, money purchase pension, and certain 403(b) plan accounts, please call T. Rowe Price Retirement Client Services at 1-800-492-7670 or consult your plan administrator. Requests for redemptions from these types of retirement accounts may be required to be in writing.

Funds held through other employer-sponsored retirement plans should call the appropriate telephone number that appears on your retirement plan account statement.

If you hold shares of a T. Rowe Price Fund through a T. Rowe Price Brokerage account and want to place a transaction, please call 1-800-225-7720.

For inquiries or to place a transaction, the hearing-impaired should call the applicable number found under "Contacting T. Rowe Price" with a relay operator or visit the T. Rowe Price website at **troweprice.com**. Inquiries may also be directed to **info@troweprice.com**.

By Mail Please be sure to use the correct address to avoid a delay in opening your account or processing your transaction. These addresses are subject to change at any time, so you may want to consider checking troweprice.com/contactus or calling the appropriate telephone number to ensure that you use the correct mailing address.

Investors (other than institutions and small business retirement plans) opening a new account or making additional purchases by check should use the following addresses:

via U.S. mail

T. Rowe Price Account Services
P.O. Box 17300
Baltimore, MD 21297-1300

via private carriers/overnight services

T. Rowe Price Account Services

via private carriers/overnight services

T. Rowe Price Financial Institution Services
Mail Code: OM-4232
4515 Painters Mill Road
Owings Mills, MD 21117-4842

Note: Your transaction will receive the share price for the business day that the request is received by T. Rowe Price or its agent prior to the close of the NYSE (normally 4 p.m. ET), which could differ from the day that the request is received at the post office box.

Accounts Held Through Financial Intermediaries

If you hold shares of a fund through a financial intermediary, you must contact your financial intermediary to determine the requirements for opening a new account and placing transactions. Financial intermediaries should refer to the following information.

Telephone To open a new account, place transactions, or ask any question about an account, please call Financial Institution Services at 1-800-638-8790.

By Mail Financial intermediaries should send new account agreements and other documentation to the following addresses:

via U.S. mail

T. Rowe Price Financial Institution Services
P.O. Box 17300
Baltimore, MD 21297-1603

via private carriers/overnight services

T. Rowe Price Financial Institution Services
Mail Code: OM-4232
4515 Painters Mill Road
Owings Mills, MD 21117-4842

INFORMATION ON DISTRIBUTIONS AND TAXES

Each fund intends to qualify to be treated each year as a regulated investment company under Subchapter M of the Internal Revenue Code of 1986, as amended. In order to qualify, a fund must satisfy certain income, diversification, and distribution requirements. A regulated investment company is not subject to U.S. federal income tax at the portfolio level on income and gains from investments that are distributed to shareholders. However, if a fund were to fail to qualify as a regulated investment company and was ineligible to or otherwise did not cure such failure, the result would be fund-level taxation and, consequently, a reduction in income available for distribution to the fund's shareholders.

To the extent possible, all net investment income and realized capital gains are distributed to shareholders.

Dividends and Other Distributions

Except for the Retirement Income 2020 Fund, dividend and capital gain distributions are reinvested in additional fund shares in your account unless you select another option. For the Retirement Income 2020 Fund, subject to certain exceptions, regularly scheduled monthly dividends may generally not be reinvested. Reinvesting distributions results in compounding, which allows you to receive dividends and capital gain distributions on an increasing number of shares.

Distributions not reinvested may be paid by check or transmitted to your bank account via Automated Clearing House or may be automatically invested into another fund account. For the Retirement Income 2020 Fund, regularly scheduled monthly dividends are generally not paid by check. If the U.S. Postal Service cannot deliver your check or if your check remains uncashed for six months, the fund reserves the right to reinvest your distribution check in your account at the net asset value on the day of the reinvestment and to reinvest all subsequent distributions in additional shares of the fund. Interest will not accrue on amounts represented by uncashed distributions or redemption checks.

The following table provides details on dividend payments:

Dividend Payment Schedule	
Fund	Dividends
Money market funds	<ul style="list-style-type: none"> • Shares purchased via wire that are received by T. Rowe Price by noon ET begin to earn dividends on that day. Shares purchased via a wire received after noon ET and through other methods normally begin to earn dividends on the business day after payment is received by T. Rowe Price. • Dividends are declared daily and paid on the first business day of each month.
Bond funds	<ul style="list-style-type: none"> • Shares normally begin to earn dividends on the business day after payment is received by T. Rowe Price. • Dividends are declared daily and paid on the first business day of each month.
These stock funds only: <ul style="list-style-type: none"> • Balanced • Dividend Growth • Equity Income • Equity Index 500 • Global Real Estate • Growth & Income • Personal Strategy Balanced • Personal Strategy Income • Real Estate 	<ul style="list-style-type: none"> • Dividends, if any, are declared and paid quarterly, in March, June, September, and December. • Must be a shareholder on the dividend record date.
These funds only: <ul style="list-style-type: none"> • Capital Appreciation & Income • Retirement Income 2020 	<ul style="list-style-type: none"> • Dividends are declared and normally paid in the middle of each month.
Other stock funds	<ul style="list-style-type: none"> • Dividends, if any, are declared and paid annually, generally in December. • Must be a shareholder on the dividend record date.
Retirement, Retirement I, Spectrum, and Target Funds: <ul style="list-style-type: none"> • Retirement Balanced and Spectrum Income 	<ul style="list-style-type: none"> • Shares normally begin to earn dividends on the business day after payment is received by T. Rowe Price. • Dividends are declared daily and paid on the first business day of each month.
<ul style="list-style-type: none"> • All others 	<ul style="list-style-type: none"> • Dividends, if any, are declared and paid annually, generally in December. • Must be a shareholder on the dividend record date.

For funds that declare dividends daily, shares earn dividends through the date of a redemption (for redemptions from money market funds where the request is received prior to noon ET and proceeds are sent via wire, shares only earn dividends through the calendar day prior to the date of redemption). Shares redeemed on a Friday or prior to a holiday will continue to earn dividends until the next business day. Generally, if you redeem all of your shares at any time during the month, you will also receive all dividends earned through the date of redemption in the same check. When you redeem only a portion of your shares, all dividends accrued on those shares will be reinvested, or paid in cash, on the next dividend payment date. The funds do not pay dividends in fractional cents. Any dividend amount earned for a particular day on all shares held that is one-half of one cent or greater (for example, \$0.016) will be rounded up to the next whole cent (\$0.02), and any amount that is less than one-half of one cent (for example, \$0.014) will be rounded down to the nearest whole cent (\$0.01). Please note that if the dividend payable on all shares held is less than one-half of one cent for a particular day, no dividend will be earned for that day.

If you purchase and redeem your shares through a financial intermediary, consult your financial intermediary to determine when your shares begin and stop accruing dividends as the information previously described may vary.

Capital Gain Payments

A capital gain or loss is the difference between the purchase and sale price of a security. If a fund has net capital gains for the year (after subtracting any capital losses), they are usually declared and paid in December to shareholders of record on a specified date that month. If a second distribution is necessary, it is generally paid the following year. A fund may have to make additional capital gain distributions, if necessary, to comply with the applicable tax law. Capital gains are not expected from government or retail money market funds since they are managed to maintain a stable share price. However, if a money market fund unexpectedly has net capital gains for the year (after subtracting any capital losses), the capital gain may be declared and paid in December to shareholders of record.

Tax Information

In most cases, you will be provided information for your tax filing needs no later than mid-February.

If you invest in the fund through a tax-deferred account, such as an IRA or employer-sponsored retirement plan, you will not be subject to tax on dividends and distributions from the fund or the sale of fund shares if those amounts remain in the tax-deferred account. You may receive a Form 1099-R or other Internal Revenue Service forms, as applicable, if any portion of the account is distributed to you.

If you invest in the fund through a taxable account, you generally will be subject to tax when:

- You sell fund shares, including an exchange from one fund to another.
- The fund makes dividend or capital gain distributions.

Additional information about the taxation of dividends for certain T. Rowe Price Funds is listed below:

Tax-Free and Municipal Funds

- Regular monthly dividends (including those from the state-specific tax-free funds) are expected to be exempt from federal income taxes.
- Exemption is not guaranteed since the fund has the right under certain conditions to invest in nonexempt securities.
- Tax-exempt dividends paid to Social Security recipients may increase the portion of benefits that is subject to tax.
- For state-specific funds, the monthly dividends you receive are expected to be exempt from state and local income tax of that particular state. For other funds, a small portion of your income dividend may be exempt from state and local income taxes.
- If a fund invests in certain “private activity” bonds that are not exempt from the alternative minimum tax, shareholders who are subject to the alternative minimum tax must include income generated by those bonds in their alternative minimum tax calculation. The portion of a fund’s income dividend that should be included in your alternative minimum tax calculation, if any, will be reported to you by mid-February on Form 1099-DIV.

For individual shareholders, a portion of ordinary dividends representing “qualified dividend income” received by the fund may be subject to tax at the lower rates applicable to long-term capital gains rather than ordinary income. You may report it as “qualified dividend income” in computing your taxes, provided you have held the fund shares on which the dividend was paid for more than 60 days during the 121-day period beginning 60 days before the ex-dividend date. Ordinary dividends that do not qualify for this lower rate are generally taxable at the investor’s marginal income tax rate. This includes the portion of ordinary dividends derived from interest, short-term capital gains, income and gains from derivatives, distributions from nonqualified foreign corporations, distributions from real estate investment trusts, and dividends received by the fund from stocks that were on loan. Little, if any, of the ordinary dividends paid by the bond funds or money market funds is expected to qualify for this lower rate.

For corporate shareholders, a portion of ordinary dividends may be eligible for the deduction for dividends received by corporations to the extent the fund’s income consists of dividends paid by U.S. corporations. Little, if any, of the ordinary dividends paid by the international stock funds, bond funds, or money market funds is expected to qualify for this deduction.

A 3.8% net investment income tax is imposed on net investment income, including interest, dividends, and capital gains of U.S. individuals with income exceeding \$200,000 (or \$250,000 if married filing jointly) and of estates and trusts.

If you hold your fund through a financial intermediary, the financial intermediary is responsible for providing you with any necessary tax forms. You should contact your financial intermediary for the tax information that will be sent to you and reported to the Internal Revenue Service.

Taxes on Fund Redemptions

When you sell shares in any fund, you may realize a gain or loss. An exchange from one fund to another fund in a taxable account is also a sale for tax purposes. As long as a money market fund maintains a stable share price of \$1.00, a redemption or exchange to another fund will not result in a gain or loss for tax purposes. However, an exchange from one fund into a money market fund may result in a gain or loss on the fund from which shares were redeemed.

All or a portion of the loss realized from a sale or exchange of your fund shares may be disallowed under the “wash sale” rule if you purchase substantially identical shares within a 61-day period beginning 30 days before and ending 30 days after the date on which the shares are sold or exchanged. Shares of the same fund you acquire through dividend reinvestment are shares purchased for the purpose of the wash sale rule and may trigger a disallowance of the loss for shares sold or exchanged within the 61-day period of the dividend reinvestment. Any loss disallowed under the wash sale rule is added to the cost basis of the purchased shares.

T. Rowe Price (or your financial intermediary) will make available to you Form 1099-B, if applicable, no later than mid-February, providing certain information for each sale you made in the fund during the prior year. Unless otherwise indicated on your Form 1099-B, this information will also be reported to the Internal Revenue Service. For mutual fund shares acquired prior to 2012 in most accounts established or opened by exchange in 1984 or later, our Form 1099-B will provide you with the gain or loss on the shares you sold during the year based on the average cost single category method. This information on average cost and gain or loss from sale is not reported to the Internal Revenue Service. For these mutual fund shares acquired prior to 2012, you may calculate the cost basis using other methods acceptable to the Internal Revenue Service, such as specific identification.

For mutual fund shares acquired after 2011, federal income tax regulations require us to report the cost basis information on Form 1099-B using a cost basis method selected by the shareholder in compliance with such regulations or, in the absence of such selected method, our default method if you acquire your shares directly from T. Rowe Price. Our default method is average cost. For any fund shares acquired through a financial intermediary after 2011, you should check with your financial intermediary regarding the applicable cost basis method. You should note that the cost basis information reported to you may not always be the same as what you should report on your tax return because the rules applicable to the determination of cost basis on Form 1099-B may be different from the rules applicable to the determination of cost basis for reporting on your tax return. Therefore, you should save your transaction records to make sure the information reported on your tax return is accurate. T. Rowe Price and financial intermediaries are not required to issue a Form 1099-B to report sales of money market fund shares.

To help you maintain accurate records, T. Rowe Price will make available to you a confirmation promptly following each transaction you make (except for systematic purchases and systematic redemptions) and a year-end statement detailing all of your transactions in each fund account during the year. If you hold your fund through a financial intermediary, the

financial intermediary is responsible for providing you with transaction confirmations and statements.

Taxes on Fund Distributions

T. Rowe Price (or your financial intermediary) will make available to you, as applicable, generally no later than mid-February, a Form 1099-DIV, or other Internal Revenue Service forms, as required, indicating the tax status of any income dividends, dividends exempt from federal income taxes, and capital gain distributions made to you. This information will be reported to the Internal Revenue Service. Taxable distributions are generally taxable to you in the year in which they are paid. A dividend declared in October, November, or December and paid in the following January is generally treated as taxable to you as if you received the distribution in December. Dividends from tax-free funds are generally expected to be tax-exempt for federal income tax purposes. Your bond fund and money market fund dividends for each calendar year will include dividends accrued up to the first business day of the next calendar year. Ordinary dividends and capital gain dividends may also be subject to state and local taxes. You will be sent any additional information you need to determine your taxes on fund distributions, such as the portion of your dividends, if any, that may be exempt from state and local income taxes.

Taxable distributions are subject to tax whether reinvested in additional shares or received in cash.

The tax treatment of a capital gain distribution is determined by how long the fund held the portfolio securities, not how long you held the shares in the fund. Short-term (one year or less) capital gain distributions are taxable at the same rate as ordinary income, and gains on securities held for more than one year are taxed at the lower rates applicable to long-term capital gains. If you realized a loss on the sale or exchange of fund shares that you held for six months or less, your short-term capital loss must be reclassified as a long-term capital loss to the extent of any long-term capital gain distributions received during the period you held the shares. For funds investing in foreign instruments, distributions resulting from the sale of certain foreign currencies, currency contracts, and the foreign currency portion of gains on debt instruments are taxed as ordinary income. Net foreign currency losses may cause monthly or quarterly dividends to be reclassified as returns of capital.

A fund's distributions that have exceeded the fund's earnings and profits for the relevant tax year may be treated as a return of capital to its shareholders. A return of capital distribution is generally nontaxable but reduces the shareholder's cost basis in the fund, and any return of capital in excess of the cost basis will result in a capital gain.

The tax status of certain distributions may be recharacterized on year-end tax forms, such as your Form 1099-DIV. Distributions made by a fund may later be recharacterized for federal income tax purposes—for example, from taxable ordinary income dividends to returns of capital. A recharacterization of distributions may occur for a number of reasons, including the recharacterization of income received from underlying investments, such as REITs, and distributions that exceed taxable income due to losses from foreign currency transactions or

other investment transactions. Certain funds, including international bond funds and funds that invest significantly in REITs, are more likely to recharacterize a portion of their distributions as a result of their investments. The Retirement Income 2020 Fund is also more likely to have some or all of its distributions recharacterized as returns of capital because of the predetermined monthly distribution amount.

If the fund qualifies and elects to pass through nonrefundable foreign income taxes paid to foreign governments during the year, your portion of such taxes will be reported to you as taxable income. However, you may be able to claim an offsetting credit or deduction on your tax return for those amounts. There can be no assurance that a fund will meet the requirements to pass through foreign income taxes paid.

If you are subject to backup withholding, we will have to withhold a 24% backup withholding tax on distributions and, in some cases, redemption payments. You may be subject to backup withholding if we are notified by the Internal Revenue Service to withhold, you have failed one or more tax certification requirements, or our records indicate that your tax identification number is missing or incorrect. Backup withholding is not an additional tax and is generally available to credit against your federal income tax liability with any excess refunded to you by the Internal Revenue Service.

The following table provides additional details on distributions for certain funds:

Taxes on Fund Distributions
<p>Tax-Free and Municipal Funds</p> <ul style="list-style-type: none"> • Gains realized on the sale of market discount bonds with maturities beyond one year may be treated as ordinary income and cannot be offset by other capital losses. • Payments received or gains realized on certain derivative transactions may result in taxable ordinary income or capital gains. • To the extent the fund makes such investments, the likelihood of a taxable distribution will be increased.
<p>Limited Duration Inflation Focused Bond and Inflation Protected Bond Funds</p> <ul style="list-style-type: none"> • Inflation adjustments on Treasury inflation protected securities that exceed deflation adjustments for the year will be distributed as a short-term capital gain, resulting in ordinary income. • In computing the distribution amount, the funds cannot reduce inflation adjustments by short- or long-term capital losses from the sales of securities. • Net deflation adjustments for a year may result in all or a portion of dividends paid earlier in the year being treated as a return of capital.
<p>Retirement, Retirement I, Spectrum, and Target Funds</p> <ul style="list-style-type: none"> • Distributions by the underlying funds and changes in asset allocations may result in taxable distributions of ordinary income or capital gains.

Tax Consequences of Liquidity Fees

It is currently anticipated that shareholders of retail money market funds that impose a liquidity fee may generally treat the liquidity fee as offsetting the shareholder's amount realized on the redemption (thereby decreasing the shareholder's gain, or increasing the shareholder's

loss, on the redeemed amount). A fund that imposes a liquidity fee anticipates using 100% of the fee to help repair a market-based net asset value per share that was below \$1.00.

Because the retail money market funds use amortized cost to maintain a stable share price of \$1.00, in the event that a liquidity fee is imposed, a fund may need to distribute to its remaining shareholders sufficient value to prevent the fund from breaking the buck on the upside (i.e., by rounding up to \$1.01 in pricing its shares) if the imposition of a liquidity fee causes the fund's market-based net asset value to reach \$1.0050. To the extent that a fund has sufficient earnings and profits to support the distribution, the additional dividends would be taxable as ordinary income to shareholders and would be eligible for deduction by the fund. Any distribution in excess of the fund's earnings and profits would be treated as a return of capital, which would reduce your cost basis in the fund shares.

Tax Consequences of Hedging

Entering into certain transactions involving options, futures, swaps, and forward currency exchange contracts may result in the application of the mark-to-market and straddle provisions of the Internal Revenue Code. These provisions could result in a fund being required to distribute gains on such transactions even though it did not close the contracts during the year or receive cash to pay such distributions. The fund may not be able to reduce its distributions for losses on such transactions to the extent of unrealized gains in offsetting positions.

Tax Effect of Buying Shares Before an Income Dividend or Capital Gain Distribution

If you buy shares shortly before or on the record date—the date that establishes you as the person to receive the upcoming distribution—you may receive a portion of the money you just invested in the form of a taxable distribution. Therefore, you may wish to find out a fund's record date before investing. In addition, a fund's share price may, at any time, reflect undistributed capital gains or income and unrealized appreciation, which may result in future taxable distributions. Such distributions can occur even in a year when the fund has a negative return.

RIGHTS RESERVED BY THE FUNDS

T. Rowe Price Funds and their agents, in their sole discretion, reserve the following rights: (1) to waive or lower investment minimums; (2) to accept initial purchases by telephone; (3) to refuse any purchase or exchange order; (4) to cancel or rescind any purchase or exchange order placed through a financial intermediary no later than the business day after the order is received by the financial intermediary (including, but not limited to, orders deemed to result in excessive trading, market timing, or 5% ownership); (5) to cease offering fund shares at any time to all or certain groups of investors; (6) to freeze any account and suspend account services when notice has been received of a dispute regarding the ownership of the account, or a legal claim against an account, upon initial notification to T. Rowe Price of a shareholder's death until T. Rowe Price receives required documentation in correct form, or if there is reason

to believe a fraudulent transaction may occur; (7) to otherwise modify the conditions of purchase and modify or terminate any services at any time; (8) to waive any wire, small account, maintenance, or fiduciary fees charged to a group of shareholders; (9) to act on instructions reasonably believed to be genuine; (10) to involuntarily redeem an account at the net asset value calculated the day the account is redeemed, in cases of threatening conduct, suspected fraudulent or illegal activity, or if the fund or its agent is unable, through its procedures, to verify the identity of the person(s) or entity opening an account; and (11) for money market funds, to suspend redemptions to facilitate an orderly liquidation.

The fund's Statement of Additional Information, which contains a more detailed description of the fund's operations, investment restrictions, policies and practices, has been filed with the SEC. The Statement of Additional Information is incorporated by reference into this prospectus, which means that it is legally part of this prospectus even if you do not request a copy. Further information about the fund's investments, including a review of market conditions and the manager's recent investment strategies and their impact on performance during the past fiscal year, is available in the annual and semiannual shareholder reports. These documents and updated performance information are available through troweprice.com. For inquiries about the fund and to obtain free copies of any of these documents, call 1-800-638-5660. If you invest in the fund through a financial intermediary, you should contact your financial intermediary for copies of these documents.
