Investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. To obtain the most recent month-end performance, visit [troweprice.com](http://troweprice.com). Consider the investment objectives, risks, and charges and expenses carefully before investing. For a prospectus or, if available, a summary prospectus containing this and other information, call 1-800-638-7780 or visit [troweprice.com](http://troweprice.com). Read it carefully.** The Fund's total return figures reflect the reinvestment of dividends and capital gains, if any.

The T. Rowe Price Fund shares the portfolio of an existing fund (the original share class of the fund referred to as the "investor class"). The total return figures for the I Class shares have been calculated using the performance data of the investor class up to the inception date of the I Class (3/23/16) and the actual performance results of the I Class since that date. Because the I Classes are expected to have lower expenses than the Investor Classes, the I Class performance, had it existed over the periods shown, would have been higher.

<sup>o</sup>Excludes the effect of contractual expense limitation arrangements. If the expense waiver was not in effect for the 30-Day period shown, there may not be a difference in the 30-day SEC yields shown above.

Investors should note that if interest rates rise significantly from current levels, total returns will decline and may even turn negative in the short term.

The Fund is subject to risks of fixed income investing, including interest rate risk and credit risk.

\*Effective October 1, 2018, the benchmark for the Fund changed to the Bloomberg Barclays Global Aggregate Bond USD Hedged Index. Prior to this change, the benchmark was the Bloomberg Barclays Multiverse Index USD Hedged. Prior to February 1, 2017, the benchmark was the Barclays Global Aggregate ex Treasury Bond USD Hedged Index. The changes were made because the firm viewed the new benchmark to be a better representation of the investment strategy of the Fund. Historical benchmark representations have not been restated.

The fund(s) may have other share classes available that offer different investment minimums and fees. See the prospectus for details.

\*U.S. Treasury securities are issued by the U.S. Treasury and are backed by the full faith and credit of the U.S. government. The ratings of U.S. Treasury securities are derived from the ratings on the U.S. government.

\*\*U.S. government agency securities are issued or guaranteed by a U.S. government agency, and may include conventional pass-through securities and collateralized mortgage obligations; unlike Treasuries, government agency securities are not issued directly by the U.S. government and are generally unrated but may have credit support from the U.S. Treasury (e.g., FHLMC and FNMA issues) or a direct government guarantee (e.g., GNMA issues). Therefore, this category may include rated and unrated securities.
