The 1-, 5-, and 10-year annualized returns as of 9/30/19 were -1.90%, -1.61% and 4.28% for the fund. **Performance data quoted represents past performance and is not a reliable indicator of future performance. Investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. To obtain the most recent month-end performance, visit troweprice.com. Consider the investment objectives, risks, and charges and expenses carefully before investing. For a prospectus or, if available, a summary prospectus containing this and other information, call 1-800-638-7780 or visit troweprice.com. Read it carefully.** The Fund's total return figures reflect the reinvestment of dividends and capital gains, if any.

*Effective July 1, 2018, the "net" version of the benchmark replaced the "gross" version of the benchmark. The "net" version of the benchmark assumes the reinvestment of dividends after the deduction of withholding taxes. Historical benchmark representations have been restated to show net of withholding taxes. Effective January 1, 2018, the benchmark was changed to the MSCI Arabian Markets & Africa 10/40 Investable Market Index Net. Prior to January 1, 2018, the benchmark was S&P Emerging Market/Frontier Middle East & Africa Broad Market Index ex Israel Net. Prior to September 30, 2010, the benchmark was MSCI Arabian Markets and Africa Index Net. Prior to July 1, 2009, the benchmark was S&P IFCG Africa and Middle East ex-Saudi Arabia and ex-Israel Net. Prior to September 1, 2008, this benchmark also excluded Kuwait. The benchmark changes were made because the portfolio manager viewed the new benchmark composition to be a better representation of the investment strategy of the fund. Historical benchmark representations have not been restated. Investments in emerging markets are subject to abrupt and severe price declines. The fund involves a high degree of risk because of its concentration in rapidly developing economies. Share prices are subject to market risk, including loss of the money you invest. In addition, there are risks associated with unfavorable currency exchange rates and political or economic uncertainty abroad. In addition, because the fund has nondiversified status, it can invest more of its assets in a smaller number of companies than diversified funds. The fund(s) may have other share classes available that offer different investment minimums and fees. See the prospectus for details.

Past performance is not a reliable indicator of future performance. Numbers may not total due to rounding; all other numbers are percentages. Analysis represents the total performance of the portfolio as calculated by the FactSet attribution model and is inclusive of other assets that will not receive a classification assignment in the detailed structure shown. Returns will not match official T. Rowe Price performance because FactSet uses different exchange rate sources and does not capture intra-day trading. Performance for each security is obtained in the local currency and, if necessary, is converted using an exchange rate determined by an independent third party. Figures are shown with gross dividends reinvested. Sources: Financial data and analytics provider FactSet. Copyright 2019 FactSet. All Rights Reserved. MSCI/S&P GICS Sectors; Analysis by T. Rowe Price Associates, Inc. T. Rowe Price uses the current MSCI/S&P Global Industry Classification Standard (GICS) for sector and industry reporting. T. Rowe Price will adhere to all updates to GICS for prospective reporting. Figures are shown gross of fees. Returns would be lower as a result of the deduction of such fees. Performance returns are in USD.

Definitions

Active Share is a holdings based measure of active management representing the percentage of a portfolio's holdings that differ from those in its benchmark. Compared to tracking error, which measures the standard deviation of the difference in a manager's returns versus the Benchmark returns, Active Share allows investors to get a clearer understanding of what a manager is doing to drive performance, rather than drawing conclusions from observed returns. The greater the difference between the asset composition of a product and its benchmark, the greater the active share is.
