Investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. To obtain the most recent month-end performance, visit [troweprice.com](http://troweprice.com). Consider the investment objectives, risks, and charges and expenses carefully before investing. For a prospectus or, if available, a summary prospectus containing this and other information, call 1-800-638-7780 or visit [troweprice.com](http://troweprice.com). Read it carefully.** The Fund's total return figures reflect the reinvestment of dividends and capital gains, if any.

The T. Rowe Price Fund shares the portfolio of an existing fund (the original share class of the fund referred to as the "investor class"). The total return figures for the I Class shares have been calculated using the performance data of the investor class up to the inception date of the I Class (8/28/15) and the actual performance results of the I Class since that date. Because the I Classes are expected to have lower expenses than the Investor Classes, the I Class performance, had it existed over the periods shown, would have been higher.

<sup>o</sup>Excludes the effect of contractual expense limitation arrangements. If the expense waiver was not in effect for the 30-Day period shown, there may not be a difference in the 30-day SEC yields shown above.

This fund involves a high-risk approach to income from foreign bonds, and its share price could fluctuate significantly. The fund is subject to the risks unique to international investing, including unfavorable changes in currency values, as well as credit risk and interest rate risk.

The fund(s) may have other share classes available that offer different investment minimums and fees. See the prospectus for details.
