Performance data quoted represents past performance and is not a reliable indicator of future performance. Investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. To obtain the most recent month-end performance, visit troweprice.com. Consider the investment objectives, risks, and charges and expenses carefully before investing. For a prospectus or, if available, a summary prospectus containing this and other information, call 1-800-638-7780 or visit troweprice.com. Read it carefully. The Fund's total return figures reflect the reinvestment of dividends and capital gains, if any.

All investments are subject to risk, including the possible loss of the money you invest.

The fund(s) may have other share classes available that offer different investment minimums and fees. See the prospectus for details.

MARKET COMMENTARY

Global equities rose in September as U.S.-China trade tensions appeared to ease and central banks took measures to stimulate economic growth. U.S. stocks advanced over the month in response to several conciliatory trade-related gestures from U.S. and Chinese officials. Monetary policy expectations were also a major driver of market sentiment, as the Federal Reserve reduced short-term interest rates at mid-month. Developed European stock markets generally rose in U.S. dollar terms, although a weaker euro versus the dollar reduced returns to U.S. investors. Eurozone markets were lifted by European Central Bank President Mario Draghi's announcement of new stimulus measures. UK shares also rose as worries of a no-deal Brexit lessened. British Prime Minister Boris Johnson's attempt to suspend parliament for several weeks prior to the UK's expected October 31 departure from the European Union was deemed unlawful by the UK's supreme court. Developed Asian markets were mostly positive, though Hong Kong shares slipped. The city's chief executive withdrew a controversial extradition bill, but demonstrators continued to demand other changes from the government. Japanese shares outperformed the region. At the end of the month, President Trump and Japanese Prime Minister Shinzo Abe signed a limited, tariff-reducing trade deal that takes effect at the beginning of 2020. Both countries are expected to work on a wider-reaching trade agreement at some point next year. Emerging markets stocks rose over the month. Emerging Asian markets were broadly positive. South Korean shares surged and Indian shares also advanced as the central bank reduced interest rates and the government announced corporate tax rate reductions to boost growth. Chinese stocks were fairly flat, while Indonesia stocks dropped. In emerging Europe, Turkish shares surged as declining inflation enabled the central bank to reduce its key short-term interest rate. In Latin America, Argentine shares climbed, as the equity market recouped part of its deep August losses.

Sector performance in the MSCI All Country World Index was mostly positive. Financials, energy, and utilities were the top performers, while health care was the only sector to produce negative returns.

RISK RETURN CHARACTERISTICS

(Five Years ended September 30, 2019)

	Active Share* (as of 9/30/19)	Annualized Std. Deviation	Alpha	Beta	R-Squared	Information Ratio	Sharpe Ratio	Tracking Error

SECTOR ATTRIBUTION DATA VS. MSCI WORLD INDEX

(12 months ended September 30, 2019)

Past performance is not a reliable indicator of future performance. Numbers may not total due to rounding; all other numbers are percentages. Analysis represents the total performance of the portfolio as calculated by the FactSet attribution model and is inclusive of other assets that will not receive a classification assignment in the detailed structure shown. Returns will not match official T. Rowe Price performance because FactSet uses different exchange rate sources and does not capture intra-day trading. Performance for each security is obtained in the local currency and, if necessary, is converted using an exchange rate determined by an independent third party. Figures are shown with gross dividends reinvested. Sources: Financial data and analytics provider FactSet. Copyright 2019 FactSet. All Rights Reserved. MSCI/S&P GICS Sectors; Analysis by T. Rowe Price Associates, Inc. T. Rowe Price uses the current MSCI/S&P Global Industry Classification Standard (GICS) for sector and industry reporting. T. Rowe Price will adhere to all updates to GICS for prospective reporting. Figures are shown gross of fees. Returns would be lower as a result of the deduction of such fees. Performance returns are in USD.

TOP 10 ISSUERS

Definitions

Active Share is a holdings based measure of active management representing the percentage of a portfolio's holdings that differ from those in its benchmark. Compared to tracking error, which measures the standard deviation of the difference in a manager's returns versus the Benchmark returns, Active Share allows investors to get a clearer understanding of what a manager is doing to drive performance, rather than drawing conclusions from observed returns. The greater the difference between the asset composition of a product and its benchmark, the greater the active share is.

Additional Disclosures

Source for MSCI data: MSCI. MSCI makes no express or implied warranties or representations and shall have no liability whatsoever with respect to any MSCI data contained herein.
