Risks - The following risks are materially relevant to the fund (refer to prospectus for further details):

Country risk (China) - all investments in China are subject to risks similar to those for other emerging markets investments. In addition, investments that are purchased or held in connection with a QFII licence or the Stock Connect program may be subject to additional risks. **Issuer concentration risk** - to the extent that a fund invests a large portion of its assets in securities from a relatively small number of issuers, its performance will be more strongly affected by events affecting those issuers. **Sector concentration risk** - the performance of a fund that invests a large portion of its assets in a particular economic sector (or, for bond funds, a particular market segment), will be more strongly affected by events affecting that sector or segment of the fixed income market. **Small and mid-cap risk** - stocks of small and mid-size companies can be more volatile than stocks of larger companies. **Stock connect risk** - the fund may invest in certain Shanghai-listed and Shenzhen-listed securities ("Stock Connect Securities") through the Shanghai-Hong Kong Stock Connect or the Shenzhen-Hong Kong Stock Connect respectively ("Stock Connect"). This mechanism carries higher risk. **Style risk** - different investment styles typically go in and out of favour depending on market conditions and investor sentiment. **Volatility risk** - the performance of the fund has a risk of high volatility.
